

*There is no death!
There is only Evolution!*

Wisdoms from Heaven - part 1

There is no death!
There is only Evolution!

Wisdoms from Heaven - part 1
Lesson 1-10

0. Preface	4
1. Everything around you is born out of the Divine All-Source of Love	5
2. There is no death, there is only evolution	12
3. The Divine Cycle for the human being	22
4. The Cosmic Laws of Father- and Motherhood guide the evolution of Human and Universe	30
5. The Divine Father- and Motherhood in the Vedas	37
6. The Motherhood of humanity is Cosmic Holy	44
7. The deeply moving “miracle” of pregnancy	51
8. Why does a child look like the father or the mother?	59
9. Through reincarnating in new lives the Soul can evolve	66
10. The Cosmic Laws of Reincarnation, Karma and of Cause and effect	73

Preface

Dear reader,

With this book Heavenly Wisdom part 1, "There is no death! There is only Evolution", we want to introduce you to the meaning and great Love that is hidden in the Spiritual Science that was brought to Earth by Heavenly Masters and that reveals a unique all-embracing Holy Truth. See also: <https://wisdomsfromheaven.com> and https://www.facebook.com/groups/806238039563401/?ref=group_header

In the ancient history, humanity already felt that there should be a Divine power which has created all life. Through the search by man and sometimes inspired by Heavenly Masters, religions and spiritual currents arose, in which parts of that universal wisdom were revealed. However, not all wisdom was understood and correctly interpreted. Mankind was not ready for it either.

Over the past century, under the influence of growing prosperity, scientific knowledge and freedom of thought, mankind is spiritual more developed.

There is also a growing understanding and inner feeling among many people that there must be one all-embracing Divine Intelligence, one Universal Truth, one Divine Cosmology. This awareness lies hidden in every person. Therefore, listen to your mind and feelings and you will recognize this more and more within yourself.

The Wisdoms from Heaven from this book are based on the knowledge from the books of the metaphysician and prophet Jozef Rulof. Together with his heavenly masters he was allowed to step out of his body and visit the worlds after death as a spirit. Here he was taught the Cosmic Laws, from which the Universe and all life was born, and which still control everything there is, visible and invisible. Inspired by his Heavenly Masters, Jozef Rulof has written 27 books in which this unique Knowledge is recorded. See also: <https://www.rulof.org>

The Society Wisdoms from Heaven
Bram Maljaars

Lesson 1. Everything around you is born out of the Divine All-Source of Love

1.1 You Soul is born from the Divine All-Source of Love

**Everything around us is Divine.
The world around us, the visible Universe,
we live in, people, animals, plants,
is the physical manifestation of the great
mystical power we call “God”.**

Source: Quotations from the books of Jozef Rulof

*-Look up and down, to the right and left,
look at the stars and planets and look at
everything living in the universe,
then try to imagine the invisible worlds
man will get to know.*

*-All that is God. We people must learn
all that and acquire it.
Is it really not worthwhile to live for that and
give it everything you have?*

*-Man will have to earn this and accept
it in full love,
for that is God's will;
that is why we are Divine.*

The origin of the Universe p.248

1.2 The All-Source of Love reveals itself in all of creation

**Before the All-Source of Love manifested
itself in Creation, it lived in an invisible world
of silence and peace.
From that we, the human beings came to life
and also the animal kingdom and
Mother Nature.**

Source: Quotations from the books of Jozef Rulof

*-Everything which is now God,
lived before Creation in a world
of silence and peace, invisible,
because there was still no conscious
material life to be seen.*

*-But from that we came to life
as human beings,
also the animal kingdom
and Mother Nature.
Kosmologie 1 p18*

*-We all are children of God,
and it is up to us to acquire
that Divine attunement.
The Origin of the Universe p.219*

**The All-Source of Love revealed itself in millions of forms and all those revelations represents the Divine Life.
We, the human beings, are the core of the creation,
born from that Divine power of Love.**

Source: Quotations from the books of Jozef Rulof

*-God lives and works
in the creation.*

*-God revealed Himself
in millions of forms
and all those revelations
represents His own life.*

*-It is the spark of animation,
which is attuned to
His Divine life.*

The origin of the Universe p.219

1.3 You can see the All-Source of Love in millions of forms

1.4 Each person has his own free will and follows its own path of spiritual development

**The main aim of our soul is to return to our Divine Source and the only way for that is to develop our consciousness by giving unconditional love to all living beings around us.
We as human beings have a free will.
That means that we are responsible for what we do.**

Source: Quotations from the books of Jozef Rulof

*-Whatever form animating life has,
it owns that will and that Divine Spark;
it is independent and
can do as it pleases.*

*-That is why inner life will be born again,
pass on into thousands of lives
and awaken in those lives,
in order to reach the Divine Spheres.*

*-Invisible man drives the material being,
passes from one body on to the next,
causing life of the soul to awaken.*

The origin of the Universe p.231

**1.5 You can feel and experience the Divine All-Source of Love
in nature**

**Watching with Love and respect to
nature and all the live around you,
is looking in the eyes of the Divine All-Source.
And serving all this Life will enlighten
your spiritual path and develop
your soul in Love.**

Source: Quotations from the books of Jozef Rulof

*-Those who learn to understand God's
creation in the natural way,
who feel and experience
the laws of nature,
bend their heads deeply for all this simplicity,
all these infallible laws,
and recognize the Divine aim.*

*-They see and feel that it must be like this,
that this is the real truth.*

The origin of the Universe p.252

**1.6 Watching with Love and respect to the live around you,
your Soul will open itself for the Divine Light**

**The main aim of your soul is to return to
the Divine Source and you achieve that only
by developing your consciousness and learning
to give unconditional love to all living beings
around you.**

**And that is precisely what Jesus meant when
he said “Love your neighbor as yourself.**

-We, the human beings are
the core of the creation, born from that
Divine power.

-So, watching with Love and respect to the live
around you is looking in the eyes of God.
And serving all this Life will enlighten your soul
and your own spiritual path.

-What kind of religion or philosophy you follow,
it does not care.
If you follow the way of Love,
your soul will find his way Home.

The Society Wisdoms from Heaven

Lesson 2. There is no death, there is only evolution

*I'm not gone,
I'm simply enjoying the next
stage of my journey.
So please be happy for me,
trust that we shall meet again*

*According to the Wisdom of
Jozef Rulof*

2.1 There is no death. Soul and spirit go further

**There is no death, there is only evolution.
The divine laws of Fatherhood and Motherhood
and Reincarnation and the laws
of Karma and Cause and Effect bring mankind
back to the Source.**

For this reason, man gets many new lives.

Source: Quotations from the books of Jozef Rulof

*-The end of one life is the entering
of the next one.
The child of the earth must know that*

*-Do not be afraid of death anymore,
love it as a 'law';
you will go further!
The Cosmology 1 p.124*

*-Accept however that it is your inner live,
the way you think and feel and possess love.
-Love, my brother, to possess love is light and
happiness on this side.*

Those who came back from the Dead p.118

2.2 The cycle of live and death brings live back to the Divine All-Source

In the cycle of life and death is passing on a natural transition to the next stage of development of our soul.

It is not necessary to be afraid of death. Only our body dies.

You, your soul, your personality leaves the body and goes on as a spirit.

Source: Quotations from the books of Jozef Rulof:

*-The human death, however improbable, will take the life back to God.
The Cosmology 2 p.224*

-Everything which is now God, lived before the creation in a world of silence and peace, invisible, because there was still no conscious material life to be seen.

*But from that we came to life as human beings, also the animal kingdom and Mother nature.
The Cosmology 1 p.18*

-The human being will have to die, will have to live and to return millions of times before he takes leave of Mother Earth. The Cosmology 2 p.224

*-Those are the Divine laws for the University of 'Christ'.
The Cosmology 2 p.224*

2.3 Passing away is the birth of the spirit in the astral spheres

All people are children of God and sooner or later they all reached the Heavenly Spheres of Light and here they continue their development on their way back to the Divine All Source. The Cosmic laws are righteous. Eternal damnation does not exist and God punished either.

Source: Quotations from the books of Jozef Rulof

-Passing on signifies the birth of a spirit in the spheres, like the birth of a child on earth. But the spirit needs more help when it's born than a child does.

-It requires all the spiritual doctor's powers and he also uses the energy of others to fetch the dying.

-The thoughts of the bereaved can also help them to break free from their body.'

A View in the Hereafter p.102

2.4 When passing away, the spirit frees itself from the physical body

The soul leaves the body and is attracted by the astral sphere that fits by the level of consciousness that the soul has reached in all the lives on Earth. If the soul isn't yet ready on Earth, it will be attracted by the astral World of the Unconscious to prepare for a new reincarnation.

Source: Quotations from the books of Jozef Rulof
-The cord of life connects both bodies, and it keeps the spirit wrapped within an infinitenumber of filaments. These form a soft fluid in which the spiritual body exists, and which is only visible to us.
-This fluid will develop when the person's feeling becomes spiritually attuned.
A View in the Hereafter 2 p.66

-What a sad existence life would be if it had to continue forever on earth.
Once again: man, rejoice that you are allowed to die there, a higher happiness, a higher love and bliss awaits you on this side!
A View in the Hereafter 2 p.135

-There is no dying. You free yourself as a spiritual Personality and you go to the new birth, or you go straight on to the Spheres of Light.
Question and answer Part 5 p.218

2.5 Your dead are alive. You will see them again someday

**Your dead are alive.
You will see them again someday.
Do not be afraid of death.
No matter how sad the parting may be,
the soul continues its way and sooner or
later you see each other back in the Spheres
of Light.**

Source: Quotations from the books of Jozef Rulof

*-Your dead are alive!
They live on our side, in the land of eternal love
and eternal peace.*

*-You must not stop them in their evolution
towards higher spheres because they cannot
reach them if they are constantly drawn back
to the earth by those they leave behind and
keep on mourning them.*

*-You must therefore think of them as loved ones
whom you have indeed lost,
but whom you will see again someday.*

A View in the Hereafter 1 p.236

2.6 A child that leaves the Earth becomes loving received in the Spheres of Light

A child who leaves the Earth at a young age is received in the Spheres of Light and lovingly cared for by a spiritual mother. This soul needed the experience of this piece of life and this passing on, to be able to continue in the Spheres of Light

*Source: Quotations from the books of Jozef Rulof
-The child that leaves the earth early finds itself in a cosmic blessing. Spiritual Gifts p.202*

-The soul has to experience this early death, this transition to the astral life has it in its own hands. This has to do with the cause and effect of that soul. It has now experienced something on earth and returns to the Spheres of Light. Spiritual Gifts p.202

-A child that leaves the earthly life at a young age is on this side taken care of by a spiritual mother, and lovingly looked after, as an earthly mother could not do. Spiritual Gifts p.202

-The spiritual mother takes the spiritual life from the earth into her shining arms, presses it to her heart and takes it to the Spheres of Light. Spiritual Gifts p.203

2.7 A Soul that has yet to reincarnate, awaits in the “World of the Unconscious” for a new life

When a soul leaves the body and is not yet ready on Earth, then this soul is attracted by the astral World of the Unconscious until the moment of reincarnation. In this world the soul stays in a sort of meditation sleep state, up to the time that it is attracted for a new life on Earth.

*Quotations from the books of Jozef Rulof
-However, if this soul has to return to earth again in order to make up for or to experience something, then the World of the Unconscious attracts this life of the soul.*

-This world is for the soul to rest and prepare Itself for the new birth. The soul now descends to the spark stage, which is to the moment of the awakening, when creation started.

-As a Divine spark, the soul can descend into the mother organism, after which the growing process can begin.

As an adult conscious the soul cannot descend into the mother body because the soul crushes the fetus to death, since there is now too much inspiration.

-The soul as a spark now awakens in the mother, after which the growing process begins.

Spiritual Gifts p. 202

2.8 There is no death, there is only evolution

**There is no death, there is only evolution.
The divine laws of Motherhood and Fatherhood and
Reincarnation and the laws of Karma and Cause and Effect
bring mankind back to the Source.**

**For this reason, man gets many new lives.
Life is sacred. People, animals, nature, planets,
everything is born of the Divine Source.
Our entire universe is a visible manifestation of that,
what we humans call “God”.**

-In the cycle of life and death is passing on
a natural transition to the next stage of
development of our soul.

-It is not necessary to be afraid of death. Only our body dies.
You, your soul, your personality leaves the body
and goes on as a spirit.

Our body, that has served us during this life,
we give back to Mother Earth.

During the process of passing on the spirit is often picked up
by acquaintances who live in the spheres of Light.

-As the soul is ready with its development on Earth,
it is attracted by the astral sphere
that suits by the level of consciousness that the soul
has reached in all the lives on Earth.

**2.9 Every person follows its own spiritual development path
on the way to the Divine All-Source**

**All people are from the Divine All-Source of Love
and sooner or later they all reached the
Heavenly Spheres of Light
and here they continue their development on
their way back to the Divine All Source.
Every soul follows its own spiritual development path.**

The Cosmic laws are righteous.
Eternal damnation does not exist and
God punished either.
But. . . man has received a free will and is therefore
responsible for his own actions!

Mother Earth is an important learning school.
All the errors that have been made in past lives
must first be compensated.
These are important lessons of which the soul learns
and then can continue with its evolution.

What kind of religion or philosophy you have,
it does not care. If you follow the way of Love,
your soul will find his way Home.
Do not be afraid of death. How sad the parting may be.
The soul continues its way and sooner or later you see
each other back in the realms of light.

Lesson 3. The Divine Cycle for the human being

*Our Soul is born from
the All-source of LOVE
and must develop
seven degrees of LOVE
to reach the
Divine All-Love*

*According to the Wisdom of
Jozef Rulof*

3.1 All live is born of the Divine All-Mother and evolves to return

Billions of years ago our Universe was born from the All-Source, the Divine All-Mother. The birth process of the All-Mother experienced seven eras of development.

In the final phase, an enormous sphere of Divine spiritual plasma, trembling gold light, was created. This plasma split into two Divine Basic Forces: expanding Motherhood and creating Fatherhood. From this the universe and all life was born, which then began to evolve.

Source: Quotations from the books of Jozef Rulof

-And now every spark had... Every spark that came from that All-Source and which could not yet be seen, spiritualized itself, materialized and must return to the conscious Divine All.

-You are that we are that, the flowers are that, the waters are that, the animal is that. All that life returns to God, must return to God, otherwise that universe will collapse.

Lectures Part 1 p.392

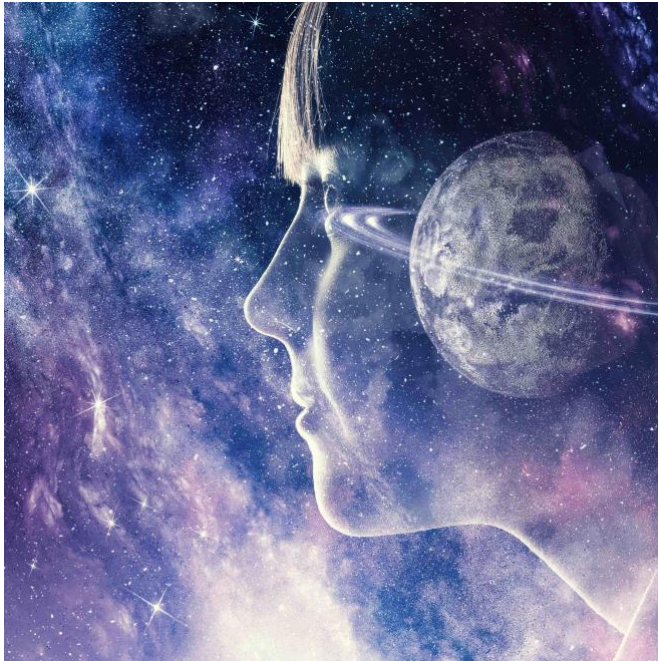

-Thus, André, death and birth, passing over and returning to the Divine source applies to all these enormous planets, but also to the smallest insect known on earth.

The origin of the Universe p.132

-Nature evolves, all its life, we too, but this universe will dissolve completely one day, because the human being and all life will then have conquered this universe.

-We return to God in order to represent him there, in the Divine 'All', because we are Gods!

Question and Answer part 1 p. 60, 61

3.2 In order to reach the highest consciousness, man must master the entire Universe and the Holy cosmic laws

We humans are born of the All-Source as a spark of Divine Life and we are supposed to develop our consciousness in such a way that we can eventually return to the Divine All. In order to reach that consciousness, man must master the entire Universe and the Holy cosmic laws.

*Source: Quotations from the books of Jozef Rulof
-At the beginning of creation there was darkness.
That darkness was in essence energy,
and that energy is God.*

*-Invisible energy, therefore, which condensed into suns,
stars and planets and revealed itself in man and animal.
The origin of the Universe p. 251*

*-When God divided Himself, when he gave Himself away spitting
Himself into millions of particles out of which we humans grew,
there was a great purpose in this.*

*-It was God's will that we, His Life, should go through one
evolution after another, thereby experience grade after
grade to acquire His holy laws*

*-It was God's will that we should become aware of
his entire plan of creation.
My Revelations to the People of the Earth p.37*

*-We have to accept a Divine cycle as Human beings.
Lectures Part 2 p. 66*

**3.3 All creation is born from the Divine All-Source of Love,
but only the human Soul is Divinely aware**

**The human being is the heart of the Divine Evolution.
In order to recognize and understand this in our daily lives,
it is necessary to learn to know the origin and
existence of All.**

**Man, as a Divine spark, must develop
Divine consciousness by getting to know the Universe,
visible and invisible**

Source: Quotations from the books of Jozef Rulof

*-Therefor He created us, men and woman,
after His own image.*

*-Into men and women, He placed His divine Kernel,
part of Himself, His Godlike feeling.*

*-Into their hands He placed His All, the material and
the spiritual Universe.*

My Revelations to the People of the Earth p.37

*-God created the universe for mankind; He created stars
and planets; but he made mankind after his own image.*

The origin of the Universe p.81

*-God wanted us through His attunement to become like God,
to pass consciously into the universe and to acquire that.*

*-A spark of God is the animal on earth, a piece of stone,
a fragment of iron, but we are the conscious, inspiring
beings who have received this gift from God.*

The origin of the Universe p.200

3.4 The Cosmic laws of Father- and Motherhood and Reincarnation direct the the evolution of man and all other life

The All-Source, from which we were born as humans, is feminine and masculine. The Cosmic Basic Laws of Expansion and Creation, Motherhood and Fatherhood and the Law of Reincarnation govern the evolution of man and all life. We see these laws in the entire universe and in everything directly around us.

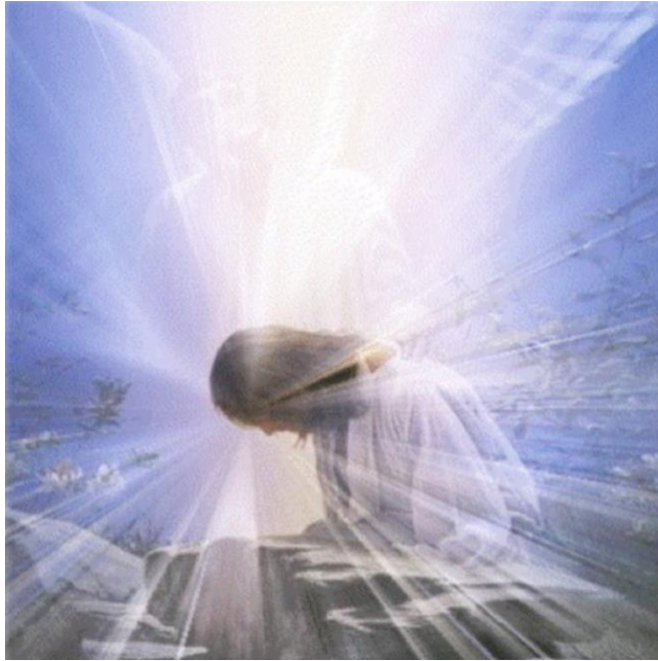

*Source: Quotations from the books of Jozef Rulof
-God gave the human being fatherhood, motherhood, reincarnation. The human being received that for nothing. That is the Divine core for the human being, for the animal, for the life in Mother Nature. Lectures Part 2 p.411*

-All these laws belong to you. They live under your human heart. But you have to master them. And that becomes your consciousness. That becomes your fatherhood and motherhood. That becomes the sphere in which you will live!

*-We as human beings master the life of feeling of the All-Mother!
And that is everything!
The Cosmology Part 1 p.162*

*-You must accept that fatherhood and motherhood for the space and for all the life is the essential source as a result of which you evolve.
Lectures Part 1 p.404*

*-The creation is Divinely sacred.
The deed of creation, the multiplication for the human being, for man and woman is Divinely pure.
Lectures Part 2 p.223*

**3.5 Everything vibrates with LOVE and radiates like
a Sun and that is the POWER of LOVE**

**When man feels that everything is in essence Divine,
then it will move him deeply and ‘this’ is love.
Because everything vibrates for love,
radiates like the sun, and this is the POWER of LOVE,
which all of us will once possess.
Then we are suns ourselves, luminous beings like the universe,
and we shall be like God.**

Source: Quotations from the books of Jozef Rulof

*-However deep everything is, everything, all those wonders are
simplicity, for God is simplicity and love.*

When man feels that, it will move him deeply and ‘this’ is love.

*-Because everything vibrates for love, radiates like the sun,
and this is the power of love, nothing but power of love,
a power which all of us will once possess.*

*-Then we are suns ourselves, luminous beings like the universe,
and we shall be like God.’*

The Origin of the Universe p.101-102

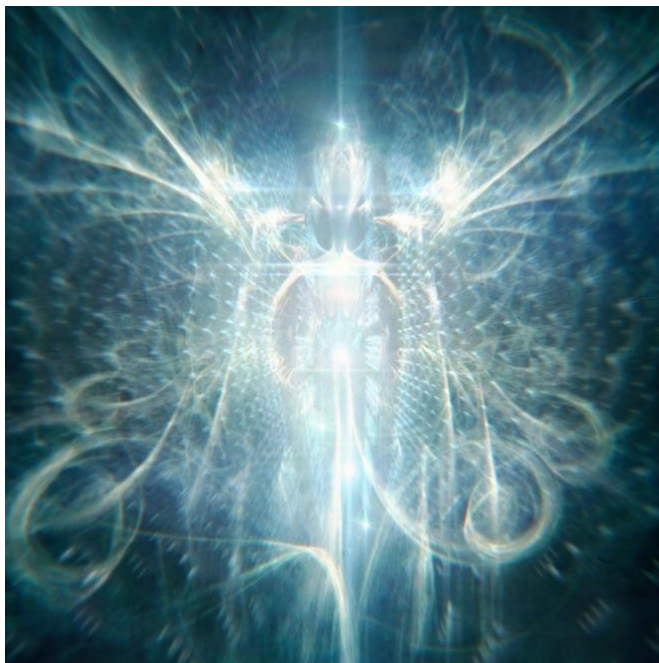

*-We who live on the side beyond have learned and
understood the message of Christ and we accept that
the entire cosmos is inhabited.*

-We have learned that we are like God and we will pass on into it.

You must acquire this.

*-Love each other like you love yourself. Look up,
Divine happiness awaits you. It is up to you to earn it,
to acquire all this.*

The origin of the Universe p.372

**3.6 Once we ourselves are Divinely conscious, brilliant
luminous beings**

**Billions of years ago our Universe was born from
the All-Source, the Divine All-Mother.
During the big bang, this energy divided itself and
created stars and planets from which human and
all life emerged as a cellular life from God's sparks
and began to evolve.**

-The visible Universe around us: people, animals, nature, water,
rocks, stars and planets is a material manifestation
of that immense Intelligence which we, people call God.
In addition, there is also the astral, invisible Universe.
All of this is God.

-We, the human beings, are born as sparks of God's life
from the All-Source and we are supposed to develop
that we can eventually return to the Divine-All.
For this purpose, God created the Universe for mankind.
Man, as Divine spark must develop and must acquire
the universe, visible and invisible.

-That means evolution, both at the physical and
the spiritual level.
For this evolution process, the human soul always
received again new physical lives.

The Society Wisdoms from Heaven

3.7 Millions of laws of life harmoniously guide the evolution of the soul

The Divine Evolution Plan is an orderly plan and is controlled in a natural harmonious way by millions of Cosmic laws of life. These cosmic laws are also reflected here on Earth again in everything. Most important for humans are the laws of Father- and Motherhood and the Law of Reincarnation. These Laws guide the human soul through the evolution process.

-The All-Source, from which we, human beings are born, is female and male, childbirth and creation.

We see these Laws again in everything.

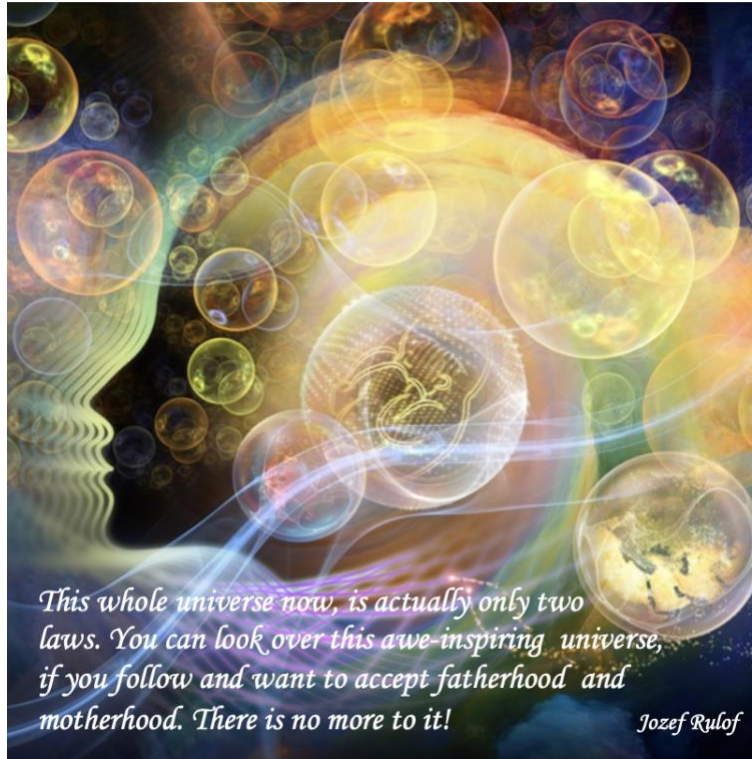

Also our universe, the expiring universe, is only Father- and Motherhood, creation and expanding, evolution and will eventually return into the Divine-All.

-The human being is at the heart of the Divine Evolution. In order to understand and recognize this in our daily lives, it is necessary to learn to know the origin of All.

-This lesson with Heavenly Wisdoms is derived from the books of the mystic Jozef Rulof and shows you who you really are a divine child following his own spiritual evolution path, back to the Divine Source.

The Society Wisdoms from Heaven

Lesson 4. The Cosmic Laws of Father-and-Motherhood guide the evolution of Human and Universe

4.1 The Universe was born from the All-Mother

Billions of years ago our universe was born from the Divine All-Source by manifestation of the All-Mother. This operation manifested itself as a changing aura, divided over seven time periods. We still find these seven phases in everything that develops.

Source: Quotations from the books of Jozef Rulof

-You see, my brothers, that the All-Source as Mother opens itself and begins with creation.

-This All-Aura will therefore fill this space and that is then the All-Maternal-Body. But by means of fatherhood and motherhood this life will condense while growing.

So, the All-Source is 'Mother'!

The Cosmology of Jozef Rulof part 1 p.21,22

-I showed you that when the All-Source, the All-Mother started to manifest herself, that aura floated into space; those were seven ages, seven transitions, that aura kept on changing.

-And we now see those ages again for all the life, the existing to which you belong.

We know on earth, for example, the seven grades for the sleep, the seven 'months' for the child according to nature.

You calculate it in months, but there are seven ages before the child is completely grown up in the mother, they are seven grades.

Lectures part 1 p.432

4.2 The All-Mother gave birth to the two Divine Basic Forces: Motherhood and Fatherhood

Two Divine basic forces were born from the aura of the All-Mother: the Motherhood-the expanding force and the Fatherhood-the creative capacity. Motherhood formed a sphere of condensed spiritual energy in the universe from which life and the first planet were born.

Source: Quotations from the books of Jozef Rulof
-The mother, the All-Mother has begun with her process of giving birth. Aura comes and that aura connects itself, spreads itself through this vastness. That is the body, the organism for the All-Mother from which God was born, from which the Father originated.
Lectures part 1 p.408

-I can now see that the astral cosmos has created the material. And that happening represents God as 'Mother'! The life went from Motherhood to the creating capacity.
The Cosmology of Jozef Rulof Part 1 p.95

-The All-Mother divided herself, the All-Mother gave birth in order to become father. What does the mother do? What happens when the child awakens? But that giving birth has become creating!
Lectures part 1 p.421

-Now we will soon see that this whole, immense, eternal universe is nothing more than a father and a mother. And that is everything. And you will see how simple everything actually is if you just know that beginning stage. Lectures part 2 p.42

4.3 The Cosmic Laws of Motherhood and Fatherhood let the Universe and all Live expand

**Everything in our universe, visible and invisible,
is originally built from Divine Energy.
This manifest itself through two Cosmic Basic forces,
two Cosmic laws. Both forces can be found in everything.
Everything is essentially energy.
Motherhood and Fatherhood. Giving birth and Creation.
Expansion and Compaction.**

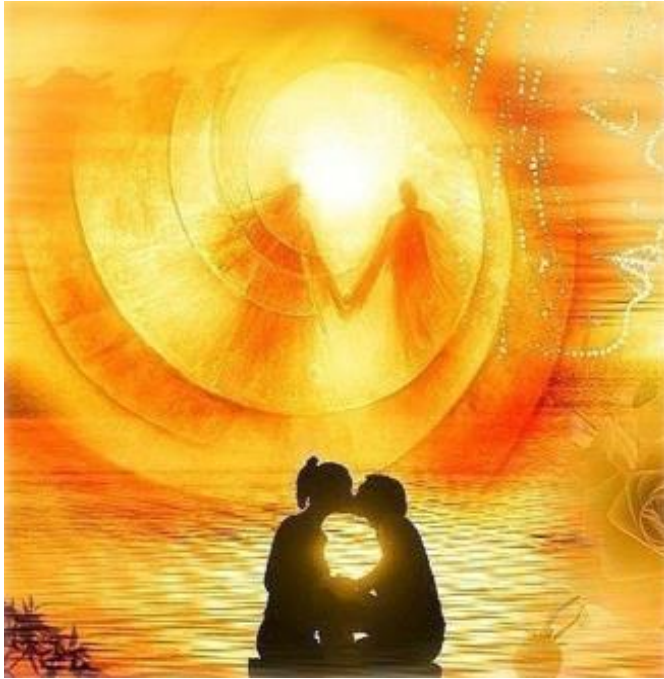

*Source: Quotations from the books of Jozef Rulof
-When God created the universe, there was only inspiration.
The first to appear were the stars and planets, the solar systems
and thousands of other objects. Subsequently man,
and this being was to have the ability to create.
The origin of the Universe p.201*

*-We now know that the universe also has a garment and
that this garment creates and gives birth, that it is growing
for this life as plasma. The Cosmology of Jozef Rulof Part 1 p.196*

*-But the human being has to accept these laws, universe and human
being are one. We see the growing universe in the
most meaningless insect. The Cosmology of Jozef Rulof Part 1 p.199*

*-This whole universe now, my brothers, is actually only two laws.
You can look over this awe-inspiring universe, if you follow and
want to accept fatherhood and motherhood.*

*There is no more to it!
The Cosmology of Jozef Rulof Part 1 p.99*

4.4 Through Fatherhood and Motherhood the Soul can develop on Earth

Expansion and evolution can be found in everything in our daily life on Earth. The human soul, as a Divine spark, must also expand, must evolve and master the Divine laws of life.

Through social life and through fatherhood and motherhood, the soul can develop and eventually gets attuned to the first Heavenly Sphere.

Source: Quotations from the books of Jozef Rulof

-Precisely as a result of marriage, and the social life and existence, the human being can master the spatial laws of life and it is for the awakening of his Divine attunement.

The Cosmology of Jozef Rulof Part 5 p.173

-When man and woman want to serve, they get attunement to the first sphere and it is only then that they experience unprecedented happiness, now the marriage is both universal and ready for carrying the laws of life!

The Cosmology of Jozef Rulof Part 5 p.188

-Those laws of growth take us to the Divine harmony, the grades of life to all those Divine characteristics, of which Love is the highest.

The Cosmology of Jozef Rulof Part 1 p.207

-Accept all of this, it is Divine truth! All these laws belong to you. They live under your human heart. But you have to master them.

And that becomes your consciousness.

That becomes your father- hood and motherhood.

The Cosmology of Jozef Rulof Part 1 p.162

4.5 The Cosmic Law of Reincarnation ensures that our Soul is constantly given new bodies, new lives to evolve

The Cosmic Law of Reincarnation ensures that our Soul is constantly given new bodies, new lives to evolve.

By giving love to the life around us we expand our consciousness.

**That was also the essence of the message that Christ brought to Earth: "Love your neighbor as yourself"
We must learn to give unconditional LOVE to all live around us.**

*Source: Quotations from the books of Jozef Rulof
-So that means that reincarnation is a Divine law.
Wants to be an overpowering law for the growing,
the returning to God. The Cosmology of Jozef Rulof Part 1 p.194*

*-Because you kept on getting new bodies, your life was ready to undergo reincarnation. Motherhood, fatherhood, reincarnation; there is no more to it.
-You are feeling, you are life. All of that is the Divine core in the human being. And now that core grows. As the universe grew, as everything expands, the human being now expands by means of his character, by means of his thinking, by means of his feeling.
Lectures part 2 p.428*

*-God gave the human being fatherhood, motherhood, reincarnation. The human being received that for nothing. That is the Divine core for the human being, for the animal, for the life in Mother Nature.
But the human being will now master that Deity,
that is now the word. Lectures part 2 p.411*

4.6 Human, Sun and Moon were the beginning of the expanding universe

Billions of years ago our universe was born from the Divine All-Source by manifestation of the All-Mother.

In the final phase, an enormous globe of vibrant and trembling gold light emerges, that at a certain moment bursts and spreads as Divine plasma in the Universe.

Similar to what Earth science calls the Big Bang.

-The Divine Energy manifested through two Cosmic Basic forces, two Cosmic laws.

Both forces can be found in everything.

Everything is essentially energy.

Motherhood and Fatherhood.

Baring and Creation. Expansion and Compaction.

-Mother Moon and Father Sun are in our universe the original representatives of these Divine forces and are the center of the creation and of the expanding Universe, where motherly planets and fatherly suns give birth and create.

-This process of “Big Bang” and expanding universe was described extensively by the Prophet Jozef Rulof in the book “The Origin of the Universe” in the 1930s. This also explains why our solar system is at the center of the expanding universe.

Something that the current science still cannot explain.

Source the book: [The Origen of the Universe](#)

Lesson 5. The Divine Father-and Motherhood in the ancient Vedas

5.1 The Vedic Doctrine knows the Divine mother, Devi Mata, who is worshiped in the mantra Jaya Jaya

Heavenly wisdom describes a unique spiritual science, a coherent system of Cosmic laws and facts, which forms the basis of everything there is. From time immemorial, mankind has received knowledge from this Source through Heavenly masters, sometimes referred to as angels. In ancient spiritual movements such as Advaita Vedanta, a Hindu movement and in the philosophy of ancient Egypt and later in early Christianity we already see simple expressions of basic principles of this universal Spiritual Science, such as the Divine All-Mother, the Cosmic Laws of Father - and Motherhood and Reincarnation. The Vedic principle of Atman is Brahman means that human soul is Divine.

Also in the Vedic teachings we find the All-Mother as Devi Mata, the Divine Mother, the Source of all life
With the chanting and recitation of this mantra
Devi Mata is honored:

*Jaya Jaya
Devi Mata
Namaha*

*“Honor to the Divine Mother,
I bow to You”*

5.2 The union of the Feminine and Masculine is Holy in the Vedas

The coming together of the Feminine and the Masculine creates new life, so that the Soul can develop further. In the ancient Vedic literature of thousands of years before our era, the coming together of the Feminine and the Masculine was already described as a Divine and Holy event, as is so beautifully expressed in this Moola mantra:

*Om Sat Chit Ananda Parabrahma
Purushot'hama Paramath'ma
Sri Bagavati Sametha
Sri Bagavate Namaha
Hari Om Tat sat (4x)*

Meaning:

When the Divine Motherhood (Sri Bagavati) comes together with the Divine Fatherhood (Sri Bagavate) and the unmanifested female energy connects with the manifesting creative masculine energy, then there is Divine bliss (Ananda), great Divine inspiration (ParaBrahma, Purusha Utama)

Refrain: You are that oh God (Hari Om Tat sat)

5.3 In the Advaita Vedanta there is no duality between the Divine and the human Soul

The Advaita Vedanta movement assumes that the human Soul (Atman) is one with the all-encompassing Divine (Brahman). In Sanskrit, the language of the Vedas and other sacred Indian writings, “Advaita” literally means not two-fold “ or no duality.

De Gayatri mantra is an ancient mantra that invokes the Divine for happiness and enlightenment:

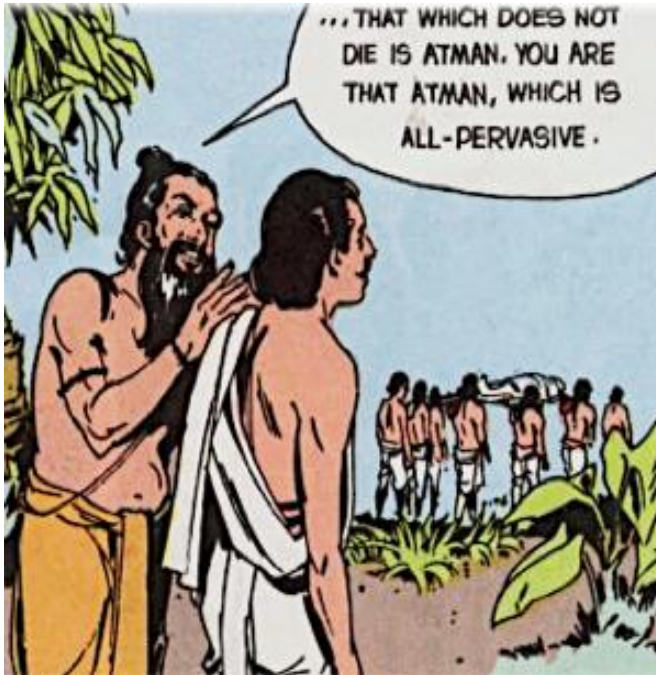

*Ohm Bhur Buva Svaha
Tat Savitur Varenyam
Bhargo Devasia Dhimahi
Dyoyo Naha Prachodayat*

Translation:

Ohm in all worlds: terrestrial, astral, and celestial, we meditate on the splendor of that Divine which illuminates us. May all that golden light nourish our understanding and guide us towards the sacred abode.

Source: Rigveda

Meaning: The mantra gives a powerful purifying energy and prays for peace, happiness and enlightenment for all living beings.

**5.4 All life is Divinely inspired: Tat tvam asi
and the Soham mantra**

**A well-known statement,
which originates in the Chandogya Upanishad is:
“Tat Tvam asi”.**

**The story in brief is as follows:
The scholar Udallaka teaches his son
Shvetaketu about the Divine Brahman
which is the source of all beings.**

*-Bring me a fruit of the Nyagrodhaboom
and splits it open.*

*What do you see? Small seeds sir.
Split one open. What do you see there?
Nothing at all.*

*-Very good my son, from that rarefied,
that you do not see raise this mighty tree.
What that rarefied thing is has the
whole world as her soul.*

*-That is reality. That is the Atman.
“You are, O Shvetaketu. “Tat tvam asi”*

*Soham Soham
Soham shivo Ham*

*Translation: I am Him, He is me.
Meaning: Atman is Brahman*

**5.5 Sri Ramakrishna:
“Service to mankind is service to God”**

Sri Ramakrishna (1836-1886) was a well-known Indian Guru with a modern interpretation of Advaita Vedanta teaching.

Sri Sarada Devi (1853-1920 left on the photo) was his wife and spiritual partner.

Swami Vivekananda (1863-1902 right on the photo) was an important disciple.

He ensured that the teachings of Ramakrishna became known throughout the world.

Ramakrishna taught them that all living beings were a form of God himself.

Therefore, service to God can be represented through service to mankind.

He emphasized God-realization as the supreme goal of all living beings.

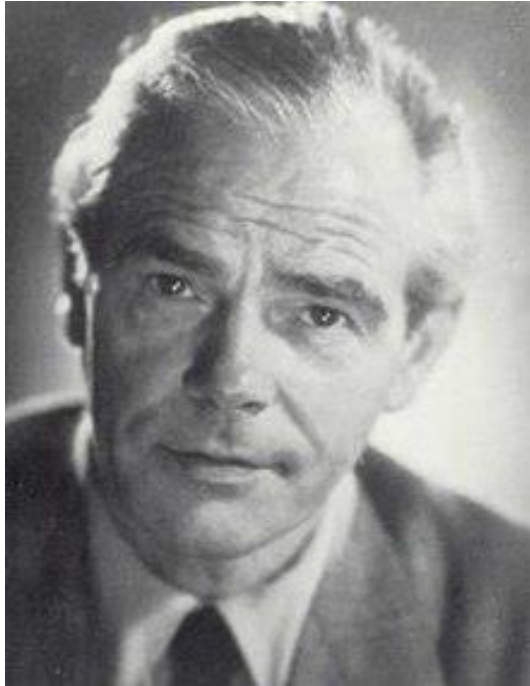

He distinguished between Amaya and Maya.

Amaya (not Maya), the dark creative power (anger, cruelty, selfishness) that keep people at a low level of consciousness and hold on to the cycle of life and death.

This must overcome man.

Vidaya maya, on the other hand, stands for spiritual virtues, unselfishness, kindness, purity, love and devotion that elevate man to the higher realms of consciousness.

He taught that the Divine Mother and Brahman are the same.

5.6 Jozef Rulof met Ramakrishna in the Spheres of Light

The metaphysician and prophet Jozef Rulof (1898-1952) was allowed with his masters to resign from his body and enter the heavenly worlds after death. Here he also had contact with Ramakrishna.

Source: Quotations from the books of Jozef Rulof

-Ramakrishna considered the waters sacred, he knows, and he got to hear from that life that he can only now understand. Yes, my brothers from the East, you went deep, you knew that we were born from the waters, that the waters possess motherhood for all the life of God. What does the sober West know about this universe? Nothing. The West thinks that the East knows nothing. But that will change!

The Cosmology of Jozef Rulof part 2 p.48

-The great Ramakrishna succumbed many times, he walked into the 'Ganges' and wanted to make himself one with Mother Water: water is motherhood and if his first follower Vivekananda had not got him out, had not saved him in time, Ramakrishna would have drowned earth.

Question and Answer Part 1 p.257

-I will say to Ramakrishna that I was able to get to know you and that will also make him happy. Do you know, 'Mother', how that child loved Your life? How he devoted himself to the people?

The Cosmology of Jozef Rulof part 2 p.14

-André sees Ramakrishna experiencing this oneness with his adept, Vivekananda follows his Master, they are still one.

The Cosmology of Jozef Rulof part 2 p.252

Lesson 6. The Motherhood of humanity is Cosmic Holy

*The mother experiences
this wonder.
That first activity and
the origin of creation
are present in the
mother organism.*

Jozef Rulof

6.1 Motherhood is Holy

During pregnancy, the mother experiences the highest Divine Law.

The mother who is expecting and will give birth to a child gives a new life to a Soul and thus serves the Divine Evolution Plan

Source: Quotations from the books of Jozef Rulof

-Accept irrevocably that God is 'Mother' for everything. It is the All-Mother by means of which all life got her independence. The Cosmologie1 p.37

-Being a mother means: possessing everything, because the macrocosmic image, the All-Source manifests itself during that short time, those months in the mother. Lectures 1 p.76-77

-The man does not experience any oneness with God. The man cannot experience that oneness.

That is only possible by means of motherhood, because motherhood possesses the Divine creation!

-This is why mother tears are deeper than those of the man! When the mother weeps, her attunement weeps, the universe weeps, which the man cannot experience anything of, because he does not experience any universal contact, is free because of his creating organism. The Cosmologie3 p.50

-If you were able to give birth to a child – you now know – this is a going higher for the earthly life; as a result of giving birth the mothers enter a higher grade of life.

Question and Answer Part 1 p.70

**6.2 Every soul, man or woman, will experience
Holy Motherhood**

**Each soul will get to know the pure
motherly love and thereby feels connected to
the Divine wonder of creation.
Through this Holy Motherhood the soul of the mother
will also extra develop**

*Source: Quotations from the books of Jozef Rulof
-This is, to enable every soul to learn and understand
pure mother love and to fathom the wonder
of God in all its depth;
it is the origin of creation, though as individual life.*

*-The mother experiences this wonder.
That first activity and the origin of creation are
present in the mother organism.*

*-Everybody will and shall become a mother;
that inspiring life is a man and a woman on earth;
it is creative and driving, the serving life.*

*-These beings will enter the male and female body
thousands of times.*

*It is, as I said, to awaken,
to experience the plan of creation.
The Origin of the Universe p.275-276*

6.3 The sex miracle is a Cosmic Law

Love and the eventually coming together of the masculine and the feminine and the attraction of a new soul is the execution of a Divine law and must be surrounded by sincere care, respect and above all pure Love.

*Source: Quotations from the books of Jozef Rulof
-The deed of creation, the multiplication for the human being, for man and woman is Divinely pure.
Lectures 2 p.223*

*-This event thus is a cosmic wonder, a power that reinforces this connection in which both beings are taken up. At the same instant that the father or the mother focusses on it, the life, the soul, is attracted.
The Cycle of the Soul p.308*

-So the paternal sperm is condensed light, born directly from the All-Mother, but brought to condensing by the Sun as father. The Cosmology 3 p.185

*-And that means that every cell, no matter where that cell lives – just look in nature, just look at a flower, just look at the insect life, the animal life – all life is busy evolving itself; fatherhood and motherhood. I explained to you that the universe wants to be only: fatherhood and motherhood!
Lectures Part 1 p.99*

**Fatherhood is subordinate to motherhood
and should serve motherhood
and that is considerably more
than fulfilling the sexual act.**

*Source: Quotations from the books of Jozef Rulof
-As a man, we miss creation, but you see that
body and soul represent laws which people on earth
still know nothing about.*

*-Science still has to awaken to this.
Spiritual wisdom is ahead of the science of the earth
by thousands of centuries.
Spiritual Gifts p.333*

*-If you know all of that, you will feel that
the Divine 'SELF' lives in you, we only just have
to materialise and spiritualise it,
there is nothing else to be experienced!*

*-And by means of fatherhood and motherhood
we come that far!*

*-This is why, my Jeus, we are both father and mother,
the organs are also in us.
The Cosmology 4 p.107*

6.4 The Fatherhood is supposed to serve the Motherhood

6.5 The Divine Source of Life is masculine and feminine and therefore also our soul

**The Divine Power is masculine and feminine.
So also the human soul, born of God,
will have to experience both fatherhood and motherhood
for his development.**

**That is why every soul, in the many lives that are
received, will be born seven times in a female body
and then seven times in a male body.**

*Source: Quotations from the books of Jozef Rulof
-I am starting to feel that I am a part of God,
but now there follows, that I must represent the Divine
source of life as fatherhood and motherhood.*

*-I will become a human being, but I am a spark of
the Divine independence,
a particle of the Divine characteristics,
by means of which I must accept that the human being
is the same as God,
that the human being
cannot damn himself, because he will expand that All-Source
as material, soul, spirit and personality,
as father and mother.*

-No, my Master, we are no longer people, but Divine cells.

*-We are Divine embryos!
People say on earth that we are people,
but who also invented that word?
The Cosmology 2 p.191-192*

6.6 The pregnant mother experiences the highest Divine law

The mother who is expecting and will give birth to a child gives a new life to a Soul and thus serves the Divine Evolution Plan.

Also the soul of the mother herself develops through this Holy Motherhood.

The Divine Power is masculine and feminine.

So also the human soul, born of God, will have to experience both fatherhood and motherhood for his development.

-In this way each soul will get to know the pure motherly love and thereby feel connected to the Divine wonder of creation.

-That is why every soul, in the many lives that are received, will be born seven times in a female body and then seven times in a male body.

-Fatherhood is subordinate to motherhood and serves motherhood and that is considerably more than fulfilling the sexual act.

-Love and the eventually coming together of the masculine and the feminine and the attraction of a new soul is the execution of a Divine law and must be surrounded by sincere care, respect and above all pure Love.

-Unfortunately, in our current world we often see a completely different picture: oppression and abuse of women, passion and gross sexuality.

The Society Wisdoms from Heaven

Lesson 7. The deeply moving miracle of pregnancy

*And then it appears that
fatherhood and motherhood,
your being a woman and
being a man,
your maternal power,
your creating power,
is the most sacred thing that
you have in your hands as
a human being and
that is experienced in
such an inferior way.*

Jozef Rulof

7.1 When is the soul of the child attracted?

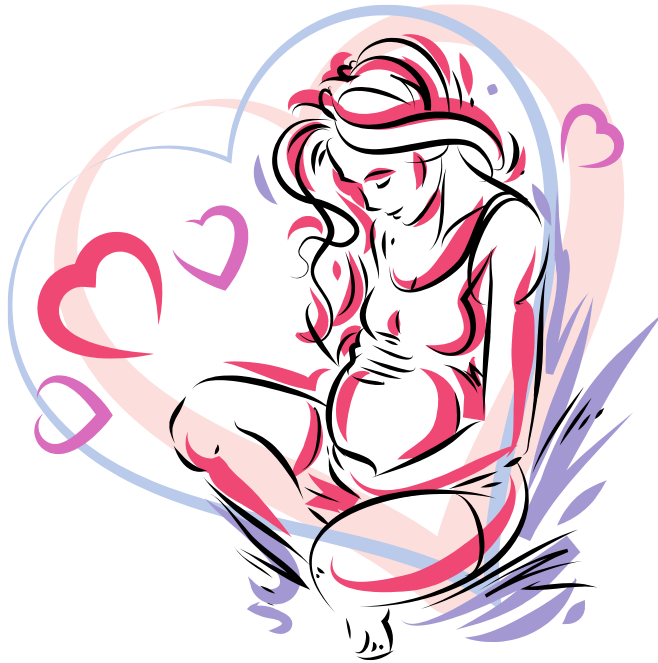

At the moment the male sperm cell and the female ovum merge, a new soul is attracted, which descends into the fertilized egg-cell. This new child, this soul, has already had many lives.

*Source: Quotations from the books of Jozef Rulof
-This event thus is a cosmic wonder, a power that reinforces this connection in which both beings are taken up.
At the same instant that the father or the mother focusses on it, the life, the soul, is attracted. The Cycle of the Soul p.308*

*-When people on earth connect, then, André, they experience the 'plan of creation'; it has not changed.
-One- thousandth of the male semen is sufficient to establish this awe-inspiring wonder. Man does not realize nor feel this; it happens in an unconscious condition, because man does not understand his own life, death and birth, nor the universe. The Origin of the Universe p.237*

-And then it appears that fatherhood and motherhood, your being a woman and being a man, your maternal power, your creating power, is the most sacred thing that you have in your hands as a human being and that is experienced in such an inferior way.

Lectures part 1 p. 50

7.2 Where does the soul of the child come from?

Before this soul was attracted, it remained in the World of the Unconscious. Here all information from past lives was erased from the day consciousness of that soul. Only the character and the personality and aspects as Talents, that have been built up in previous lives, are taken to the new life.

*Source: Quotations from the books of Jozef Rulof
-However, if this soul has to return to earth again in order to make up for or to experience something, then the world of the unconscious attracts this life of the soul. This world is for the soul to rest and prepare itself for the new birth.*

-The soul now descends to the spark stage, which is to the moment of the awakening, when creation started.

-As a Divine spark the soul can descend into the mother organism, after which the growing process can begin. As an adult conscious the soul cannot descend into the mother body because the soul crushes the fetus to death, since there is now too much inspiration.

*-The soul as a spark now awakens in the mother, after which the growing process begins.
Spiritual Gifts p.202*

7.3 Like the Divine All-mother, the human fetus goes through seven stages of development

The Divine All-Mother went through seven stages of development before the basic forces of the Universe with a kind of big bang were born.

We still see these seven phases in everything in our universe. Also during pregnancy, the fetus in the womb goes through seven developmental stages before the baby is born.

*Source: Quotations from the books of Jozef Rulof
-In the embryo, that tiny fetus which is in the mother organism and becomes a child, the entire creation is already fixed during that stage.*

-Scientists on earth have already advanced to the point that they recognize the human fish-like stage. But we see more. We see in it all periods of the planet earth, the planetary system, the universe, and also all previous transitions the human being has lived. The Origin of the Universe p.361

*-Now we will see that the embryo is neither paternal, nor maternal, but fatherhood and motherhood also get to experience that Divine independence. And that therefore means, my Master, that fatherhood will separate itself from motherhood, will divide itself, because we were also able to perceive this process for the All-Source as a mother. Those are the laws of life!
The Cosmology of Jozef Rulof part 2 p.134*

7.4 The soul is driving the new life in the mother to development

The feeling force of a soul is built up in the many lives that have been experienced. If a soul has only just descended, the feeling force is not yet at full strength. That is also the case, because a soul with full strength feeling force might damage or even kill the delicate fetus in the mother.

Source: Quotations from the books of Jozef Rulof
-The substance in the spirit represents the reality of the material, because God created all life in this way. He provided it with soul, life and spirit, which are the three foundations.
-The soul is the Divine core, the life is the All-Source. And we expand that life, we spiritualize it and we materialize it.
Lectures part 1 p.309

-Direct consciousness comes to the embryo between the third and fourth month. The parents are on the moment of conception in contact with the universe, thus this world; and such a connection can only be broken by brute force, and that is a spiritual murder. The Cycle of the Soul p.306

-Now we will continue, that evolution continues. Then I will show you: the human being is light, the human being is life, the human being is fatherhood and motherhood, the human being is soul and spirit, but the human being is also feeling. And that is the feeling of the All-Mother. And feeling is a driving force, is inspiration, and is also giving birth, that is also the All-Source in us. Lectures part 2p.30

7.5 The Emotional Strength of Mother and Child are connected

Between the third and fourth month, the emotional power and the brain function of the unborn child is so developed that it can noticeably connect itself with the emotional life of the mother.

This connection is very special. The mother feels the child and not only physically, but also mentally.

Certain characteristics of the child can manifest themselves in the behavior of the mother.

Source: Quotations from the books of Jozef Rulof

-When the mother is expectant, a link has been established with another being, a separate force of feeling. Is that clear to you? This link lasts for nine months. So she's in a state of enhanced spiritual power due to the being she is carrying.

-When this power within her finds attunement in the spirit, the mother reaches an enhanced condition which may enable her to be clairvoyant.

-When the child is born the mother feels that something is taken away from her; she can't determine what it is, she can't put it into words. So it was the force of feeling of the being, which made her sense this feeling.

-So I want to prove that the mother who understands this great miracle and can sense the link with another being, can acquire this love within this short period of time, whereas another life may need years of struggle.

-Motherhood is the most sacred thing which God can grant a woman on earth. A View into the Hereafter 2 p. 89,90

Free download the book: [A view in the Hereafter](#)

7.6 The deeper meaning of Pregnancy!

At the moment the male sperm cell and the female ovum merge, a new soul is attracted, which descends into the fertilized egg-cell.

This new child, this soul has already had many lives.

Before this soul was attracted, it remained in the World of the Unconscious, the world of the All-Mother.

Here all information from past lives was erased from the day consciousness of that soul.

Only the character and the personality and aspects as talents that have been built up in previous lives are taken to the new life.

-The Divine All-Mother went through seven stages of development before the basic forces of the Universe with a kind of big bang were born.

We still see these seven phases in everything in our universe. Also during pregnancy, the fetus in the womb goes through seven developmental stages before the baby is born.

-The evolution of man once started as a cell life in the waters. From the fish stage, the human being went further on land and eventually evolved into the physical human beings, who we are now.

7.6 continue:

-In the development of the fetus in the womb, we see this evolution in abbreviated form. In nine months, we see the beginning of cell life evolving into a full-fledged human being. The place where our tail and gills have been, and also the remnants of them, we still find in the human body even now.

-The feeling power of a soul is built up in the many lives that have been experienced.

If a soul has only just descended, the feeling force is not yet at full strength. That is also the case, because a soul with full strength of strength might damage or even kill the delicate fetus in the mother.

During the course of the pregnancy, the feeling power of the soul increases.

-Between the third and fourth month, the emotional power and the brain function of the unborn child is so developed that it can noticeably connect itself with the emotional life of the mother.

This connection is very special.

The mother feels the child and not only physically, but also mentally.

The mother experiences a higher spiritual strength by her own feeling power, together with the feeling power of the unborn child. Many mothers will experience this special feeling in the form of happiness, love, more feeling, more intuition.

-Also, it is possible that certain characteristics of the child during pregnancy manifest themselves in the behavior of the mother.

It is interesting to examine this in yourself as a pregnant mother.

Sometimes it's about simple things like change of taste.

A woman who never liked sweets can suddenly become fond of sweets.

By considering and sensing everything carefully, you as a pregnant mother can learn certain characteristics of your child before birth.

-This heightened feeling force and the fact that the mother undergoes the working of the important Divine Law of Motherhood is the basis for this.

Motherhood is therefore Holy and gives the soul of the mother an extra development opportunity.

If the child is born, the mother may miss the child in a strange way.

What she then misses is the heightened feeling of feeling that was in her all the time that she was associated with her child.

The Society Wisdoms from Heaven

Lesson 8. Why does a child look like the father or the mother?

*By giving birth and creating we attract
new life. And we have to do with that life,
or we would not attract it.*

Jozef Rulof

8.1 Between the mother and the unborn child there is a natural feeling connection

There is a natural connection of love of feeling between the mother and the unborn child. In addition, there is the karmic feeling connection with the father or the mother, which has to do with previous lives.

The father or the mother has thus attracted this new soul.

Source: Quotations from the books of Jozef Rulof

-By giving birth and creating we attract new life. And we have to do with that life, or we would not attract it.

The Cosmology of Jozef Rulof part 2 p.214

-When the soul has experienced the material grades for the body, it is faced with the laws of cause and effect.

Spiritual Gifts p.17

-If the soul has to return to the earth to make up for something, it will take care of itself and those are God's laws.

The Origin of the Universe p.392

8.2 What does it mean if your child looks like you?

**On the face of the child one can see with which parent, father or mother there is a karmic relationship.
If the child looks like the mother, then the karmic relationship is with the mother.
The other way around: if the child looks like the father, then there is a karmic relationship with the father.
Corporeal family features may also manifest in the child's face.**

*Source: Quotations from the books of Jozef Rulof
-That is not the child which comes just like that, because we were already involved with that life. If we are not involved with that life, with that soul, that personality, then we could not even attract that life.
Question and answer Part 2 p.304*

-Those who are honestly prepared to open their mind and to give themselves completely will feel and understand this and recognize cause and effect.

The Origin of the Universe p.349

8.3 How is the face of the child formed in the mother?

In the first instance, the face of the child in the womb is shaped by the own feeling. In addition, the karmic feeling connection with the parent has influence.

The stronger the karmic relationship, the more the child will look like this parent. Certain material features of father or mother's family may also manifest in the face. Joseph Rulof calls this a blood phenomenon. In our time, we rather speak of DNA characteristics.

-So the life of feeling, we talked about that a moment ago, creates and gives birth to the face.

It looks like the mother or the father, but you create and give birth to the face. Question and answer Part 2 p.306

-And you have the human paternal eye and you have the maternal eye. And if you wish to know where the maternal eye lives, and that is for the father too, then that is always the left side, your heart side, because motherhood lives there.

Lectures Part 2 p.53

-And now you will get, I told that here, that great-grandfather manifests himself in the face of this child. And she does not look like mother. Mother could have attracted that child spiritually; there is always a core there from those two, but it is hard to see, and it is now spiritual, that means, the life of feeling speaks to her from the face. And that is now from her. But great-grandfather has now manifested himself as material in this child.

-But now someone gets, it gets red hair, and both parents are dark. It is a perfectly simple blood phenomenon, but also has to do with your own branch, let us say, your own family. And if you go back very far, into the jungle, perhaps you will come across

Question and Answer Part 2 p.302,303

8.4 Where does the character and the talents of the child come from?

**Every soul has built up its own character in previous lives.
The character of your child therefore has it all by itself and can therefore not be inherited from the parents.
Talents are from past lives.**

Source: Quotations from the books of Jozef Rulof

*-This is most clearly seen in children.
On earth, these feelings are referred to as talent, intellect, but that is not the truth.
The soul has acquired these qualities in the previous life, or perhaps many lives ago.
The Origin of the Universe p.317,318*

-We can explain you that the soul is an astral personality, because of every thought or action this can be determined. For example, if your baby is looking at you, you can already accept that he draws from the life in which he once was.

*-It is not surprising at all that this child plays the piano.
His soul has acquired this feeling in past lives.
Historisch Document p.43,44*

See also the article: [Character](#)

8.5 Why is getting children so important?

The human being as Divine spark must develop and internalize the Universe, visibly and invisibly. This is only possible through physical and spiritual evolution. That is why the human soul always needs a new body, a new life

Source: Quotations from the books of Jozef Rulof

*-The human being experiences his evolution both materially and spiritually!
When the soul as human being gives birth and creates, the human being evolves!*

The Cosmology of Jozef Rulof part 5 p.145,146

-This is simple for the child of Mother Earth, but it still does not know these laws, it does not feel that by means of fatherhood and motherhood all the Divine Revelations were placed in the people's hands.

The Cosmology of Jozef Rulof part 2 p.128

-It is therefore a fact that all the life which is born by means of this development, evolves by means of fatherhood and motherhood, and are Divine fundamental characteristics.

The Cosmology of Jozef Rulof part 2 p.157

The look alike in the face of the parent and child comes about as follows:

Initially, the face of the child during the growth in the womb is formed by the own feeling. If there is a strong karmic relationship with, for example, the mother, this feeling of the mother will also affect the formation of the face of the child.

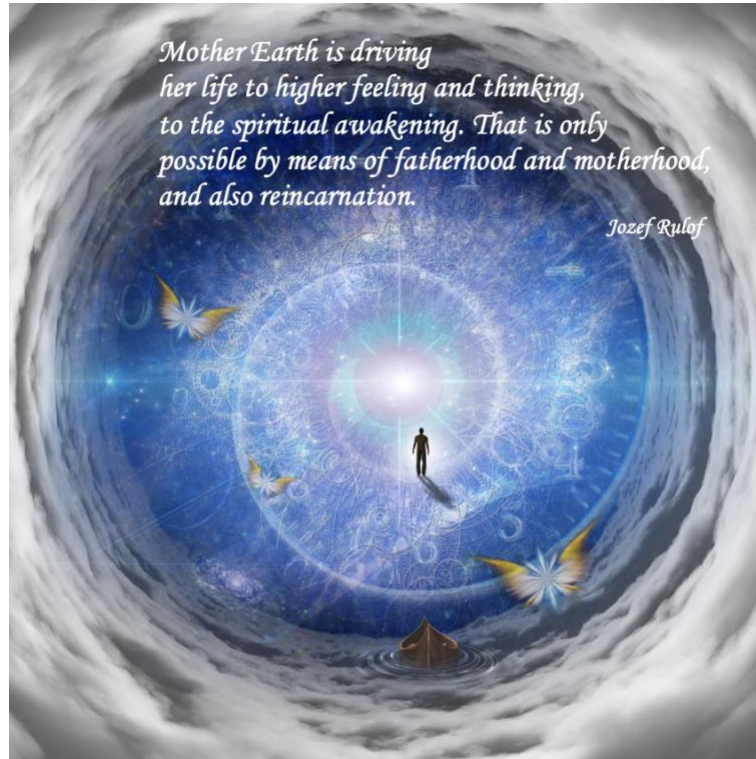

-The stronger the karmic relationship, the more the child will look like the parent in question. This karmic connection with one of the parents is not limited to the face alone. Also sensitivity to certain diseases or the resistance to certain diseases or ailments can have the child of the parent where it seems most like. There is a natural connection of live of feeling between the mother and the unborn child.

-Every soul has built up its own character in previous lives. The character of your child therefore has it all by itself and can therefore not be inherited from the parents. Yet the characters of children can look like those of the parents, because of course there is influence by education. It is also the case that parents attract children who have attunement to their own life of feeling.

8.6 The cosmic relationship between parent and child

The Society Wisdoms from Heaven

Lesson 9. Through reincarnation in new lives the Soul can develop

9.1 The human soul is born of the All-Source and will have to develop to become Divinely aware

**The human soul is born from the Divine Source,
the All-Mother.
But to obtain Divine consciousness, the soul must evolve
and internalize the entire Universe, visible and invisible.
The laws of Fatherhood and Motherhood,
Reincarnation, Karma and Cause and Effect
guide this evolution process.**

*Source: Quotations from the books of Jozef Rulof
-God wanted us through His attunement to
become like God, to pass consciously into the universe
and to acquire that.
The Origin of the Universe p 200*

*-That is why inner life will be born again,
pass on into thousands of lives and awaken in those lives,
in order to reach the Divine Spheres.
The Origin of the Universe p.219*

*-God gave the human being fatherhood, motherhood,
reincarnation.*

*The human being received that for nothing.
That is the Divine core for the human being,
for the animal, for the life in Mother Nature.
But the human being will now master that Deity,
that is now the word.
Lectures part 2 p.411*

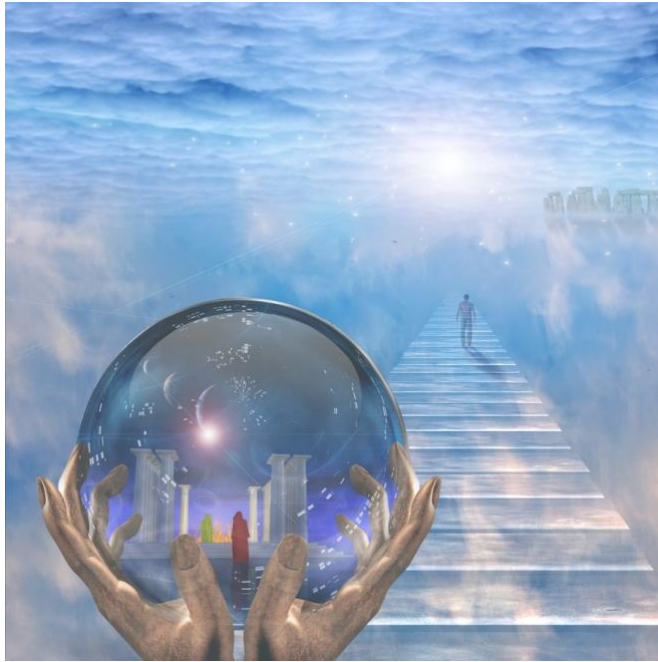

**9.2 The first three Cosmic Grades of live are in our universe
with the mother planets Moon, Mars and Earth**

Human Soul and Cosmos must go through seven evolutionary phases before the Divine All is achieved. The first three Cosmic Grades of live are in our universe with the mother planets Moon, Mars and Earth. The first Cosmic Degree, which received life, was the Moon. Man has been born here in the waters as an animated cell. The planet Mars is the core of the second Cosmic Degree. The Earth on which we now live, is the core of the third Cosmic Degree.

*Source: Quotations from the books of Jozef Rulof
-God created three following grades of life for these spaces.
As main planets they are: Moon, Mars and Mother Earth.
Lectures part 3 p.180*

*-Believe me, André, when I say that not hundreds, but thousands of lives are necessary to fully experience the third cosmic degree, the planet earth, at cosmic attunement, as the spirit Lantos told you in 'The Cycle of the Soul'.
The Origin of the Universe p.170*

*-The human being first gets that consciousness through Mother Earth, because the earth is a child of sun and moon, the earth will possess the highest consciousness for this universe.
Lectures part 2 p.98-99*

**9.3 The Earth is an important learning school.
The Soul can experience conscious good and evil here**

**The Earth is an important learning school.
Here the soul experiences conscious good and evil
for the first time.**

**In order to be able to develop the life of feeling,
the Soul gets many lives and will be able to get
to know
all forms of human life on Earth.**

*Source: Quotations from the books of Jozef Rulof
-Earth was a planet where man had to learn, a school,
and in that school one had to learn about one's self.
The Cycle of the Soul p.231*

*-We know that Mother Earth is the only planet for the
Third Cosmic Grade of Life which possesses
conscious good and evil.
The Cosmology of Jozef Rulof part 1 p.253*

*-Mother Earth is driving her life to higher feeling and thinking,
to the spiritual awakening. That is only possible by means of
fatherhood and motherhood, and also reincarnation.
The Cosmology of Jozef Rulof part 4 p.211*

*-The planet earth is ready but mankind lags behind.
Material life is far, very far ahead of inner life, but all
these human beings do not want to realize that.
The Origin of the Universe p.367
Free download the book: [The Cycle of the Soul](#)*

9.4 The fourth Cosmic Grade is a new universe for the evolution of the Soul

The cosmic laws of Fatherhood and Motherhood and Reincarnation send the human Soul ever further through the Universe on the way to the Divine All. There are a total of seven Cosmic Degrees of spiritual Love.

The Earth and the Celestial spheres form the third Cosmic Degree. Then the Soul goes on to the fourth Cosmic Degree, a new Universe for the further evolution.

*Source: Quotations from the books of Jozef Rulof
-There are seven degrees of spiritual love in the universe, which is the universal attunement.*

Now the life that exists in the seventh degree passes on from there into the Divine-All.

A View into the Hereafter 2 p.134

-And already by means of this, my sisters and brothers, we know that this space, this universe, had to create another universe, because this is still not the Divine All, and we will soon enter the fourth cosmic grade of life. Lectures part 3 p.292

-Now the life that exists in the fourth attunement, they are holy beings with a spiritual attunement. They may call themselves holy because they possess these powers and are therefore spiritual beings.

A View into the Hereafter 2 p.134

9.5 Through Reincarnation human can have spiritual and a physical evolution

In order to be able to evolve spiritual and physical, the human soul always needs a new body, a new life, in ever-changing situations.

When this physical evolution is completed on Earth, the Soul begins to dissolve the direct karma.

Only then does Mother Earth let the Soul go and is it attracted by the astral sphere that connects to the level of consciousness that it has achieved in all earthly lives.

Source: Quotations from the books of Jozef Rulof

-Man not only needed millions of years for his material development, but also for his inner life.

Both follow one course up to the very highest, which are the Divine Spheres. The Origin of the Universe p.178

-God – it is Mother Earth – first gives us the seven grades for the human organism to experience and this also happens infallibly. It is only then that we begin with making good.'

Question and answer Part 1 p.252

-The human being experiences his evolution both materially and spiritually!

When the soul as human being gives birth and creates, the human being evolves!

The Cosmology of Jozef Rulof part 5 p.145,146

The painting: *'The human path of life'. Painted by the ghost of the painter Vincent van Gogh with the help of the body of Jozef Rulof in trance.*

9.6 Every soul has a free will and follows its own path to enlightenment

We humans are born as a spark of Divine LOVE from the All-Source and we are meant to develop in such a way that we eventually reach the Divine All.

For this purpose, the All-Source created the Universe for man.

The human being as Divine spark must develop and internalize the Universe, visibly and invisibly.

-This is only possible through evolution, both on a physical and on a spiritual level.

The Cosmic laws of Fatherhood and Motherhood, Reincarnation, Karma and Cause and Effect guide this evolution process.

-The laws of Karma and Cause and Effect ensure that every soul can make good his mistakes.

-The Divine laws are righteous, damnation for ever does not exist.

-There are in total of seven Cosmic Degrees.

The Moon is the first Degree.

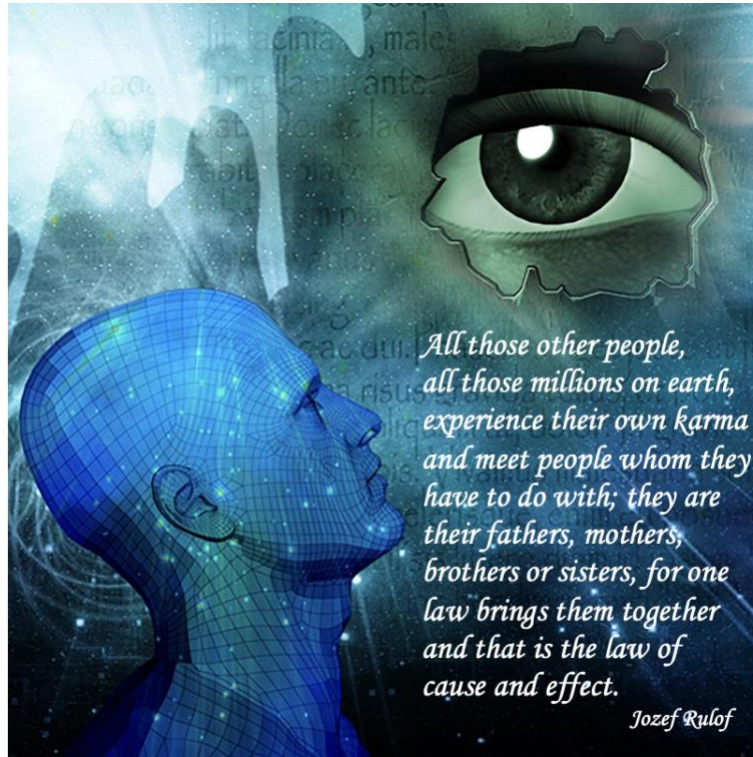

The planet Mars is the core of the second Cosmic Degree.

The Earth on which we live now, is the core of the third Cosmic Degree.

-After the Earth and the Celestial Spheres, the human Soul moves on to the fourth Cosmic Grade of Live.

The Society of Wisdoms from

Lesson 10. The Cosmic Laws of Reincarnation, Karma and of Cause and Effect

10.1 The law of Karma or the law of Cause and Effect?

The term karma is often mentioned in situations when one has to make good something with someone else. Yet there is a fundamental difference between direct karma as Law and general karma caused by Cause and Effect. In the case of direct karma, it is always about solving murder, because there was taken a "life" and "life" is Divine. Only then the Law of Karma take effect. That soul has created disharmony and must restore that.

*Source: Quotations from the books of Jozef Rulof
-There are people who make karma of everything, but karma is: if you have to make amends to a human being.
So karma already dissolves in cause and effect.
Small things, lies, cheating and we will just live it up, that is still cause and effect. But karma, direct karma is a law. And cause and effect is also a law, but those laws have to do with the human being, and karma directly with God.*

*-The difference between cause and effect and karma therefore means, that which we have in our own hands, and that which concerns the divine law:
the birth, motherhood, fatherhood.
But only reincarnation is karma.
And karma is for nothing else,
because that one law only has to do with reincarnation. QUE-vraag2 p.282-283*

*See also the articles: [Karma](#)
[Cause and effect](#)*

10.2 Through motherhood we can restore karma

**When we commit a murder, we deprive a soul a life.
We created disharmony and must restore that.
That soul must be compensated by receiving a new life.
The Law of karma has several solutions to arrange
this. One of them is that in a next live as a mother,
we receive this soul as a child.
In special situations a mother can also give birth
to a child for the karma of the father.**

*Source: Quotations from the books of Jozef Rulof
-This is going further! The soul gives a new organism to
the murdered life and now goes further.
She will free herself from her cause and effect and
from the disharmonic laws.
And then she will end her cycle! Then the material life will
be completed and she will stand before her spiritual world.
The Cosmology of Jozef Rulof part 5 p.100*

*-The soul, who puts an end to life on earth, as I explained
to you, must and will return on earth in order to experience
the third cosmic degree. The Origin of the Universe p.486*

*-The father knows that soul.
So the mother gives birth for herself, and also gives birth for the man.
So two different karmas are busy there. the creating karma and the
maternal karma. Question and Answer Part 3 p.151*

10.3 We mainly meet people, with whom we have a karmic relationship

In our lives we mainly deal with people, with whom we have a karmic relationship, usually due to just cause and effect and sometimes due to murder.

General karma due to cause and effect can be restored in many ways.

This type of karma can even be made good if the soul has already reached the first Heavenly sphere of light.

*Source: Quotations from the books of Jozef Rulof
-There is not one human being, listen what I say, who will meet lives, souls, he has nothing to do with.*

*-All those other people, all those millions on earth, experience their own karma and meet people whom they have to do with; they are their fathers, mothers, brothers or sisters, for one law brings them together and that is the law of cause and effect.
The Origin of the Universe p.417*

*-We can enter the first sphere on this side when we are free from hatred, passion and violence and already possess love, although we still have sins and faults that we can make up for only now.
The Origin of the Universe p.531-532*

**10.4 All of our lives are in our reincarnating
live of feeling**

**Through everything we experience
during our lives,
the soul develops more consciousness,
more Love and more feeling.
As a result, our live of feeling evolves, which with
every incarnation also goes along with the new live.
From this reincarnating life of feeling, our soul
feels attracted to those people who have
a karmic relationship with us.**

*Source: Quotations from the books of Jozef Rulof
-Just like that: I want to be that, I want this; and then
of course the life of feeling speaks of its own accord,
but you brought that with you from previous lives.*

*-Because if we begin here, then we begin with a clean
slate for this life, but what there is, is all reincarnation.*

We are completely blank for this life.

We have to deal with this light.

*The light in the eyes only comes after seven days; and then
we start to look and then the past immediately recedes.*

*-If that child could be adult now and could speak,
then reincarnation would lie completely open*

and then you

would see into all those other lives.

Question and Answer Part 2 p.22

10.5 Where does the soul come from, who reincarnates on Earth?

Someone who passes away and later has to reincarnate into a new life is attracted to the World of the Unconscious.

The soul falls asleep here and all information disappears from the daily consciousness.

Only then the Soul is ready to reincarnate in a new live.

From the first Light sphere one can voluntarily incarnate to perform a certain task.

Even from the dark spheres one can receive the grace to incarnate in a life on Earth.

Source: Quotations from the books of Jozef Rulof

-What has fallen asleep in the world of the unconscious, will awake when this life is born again. This is the inspiration for the development of the material organism.

The Origin of the Universe p.120

-When we live in the world of the unconscious waiting for an incarnation, we receive exactly that what we do not want, because it is the very thing we do not own yet.

The Origin of the Universe p.288

-Do not forget that when one lives in the darkness, one does not have anything but darkness and cold.

-While on earth, it will irrevocably meet that inner life to which it must make up.

-Thus, God comes to the aid of this life.

The Origin of the Universe p.507

10.6 Main issues of reincarnation and karma

Karma is found in situations, where someone has to make good something with someone else.

Karma is a well-known concept, especially in Eastern religions. In the wisdom of Josef Rulof, a fundamental difference is made between direct karma according to the Law of Karma and general karma according to the Law of Cause and Effect.

-Direct karma applies when it concerns a murder. With murder one takes a life of another and therefore of God, because then one comes to "life" and "life" is God. Only then does the Law of Karma come into effect. In order to make this good again, that soul must be compensated by receiving a new life.

-The Law of karma knows several solutions to arrange this. One of them is that we become a mother again in one of our next lives and receive this soul as a child. In special situations there may be so called, "creating karma". In this case the father attracts the child and the mother gives birth to the child for the karma of the father.

-Also, general karma, due to cause and effect, will have to be made good. From the reincarnating life of feeling our soul ensures, that we are attracted to those people who have a karmic connection with us.

Wisdoms from Heaven are based on the books of the metaphysician and prophet Jozef Rulof (1898-1952). With the help of his Heavenly Masters, he was able to disembodied and then as a spirit he was able to visit the astral worlds after the death.

Here the Cosmic Laws, who guide all life, were learned to him.

On the mentioned website you will find all books, articles and reference works that together contain a wealth of spiritual Wisdom and Knowledge.

Read and be amazed!

Wisdoms from Heaven is about the origin and essence of Life and gives a clear insight in topics such as:

- Life after death and the meaning of life
- The birth of the soul from the two Divine Basic Forces
- The spiritual path of the soul, the evolution back to the Source
- Everything in the Universe is changing and evolving
- The human soul is the core of this Divine evolution
- The most important Cosmic Basic Forces and Laws are:
 - The Cosmic Motherhood, the expanding force
 - The Cosmic Fatherhood, the condensing and creative force
 - The Law of Reincarnation
- The Law of Karma and the Law of Cause and Effect
- All these Cosmic Laws govern the expanding Universe, but also the birth of a child on Earth
- The development of pregnancy in the mother and the moment when the soul descends
- What does it mean when the child looks like the mother or the father
- Why we humans must reincarnate and how the Law of Reincarnation works
- What is the effect of "Karma" and of "Cause and Effect"

All these wisdoms are based on a Unique All-embracing Wisdom, which comes directly from the Spheres of Light and which was only detailed and well founded in the last century by the metaphysician Jozef Rulof and his Heavenly Masters. We, the people of our time, are now so far spiritual developed that we can understand this Heavenly Knowledge and, more importantly, we can feel it!
