Preface

Dear reader,

With this book Wisdom from Heaven part 2, " Reincarnation. Creation. Twin souls ", we want to introduce you to the meaning and great Love that is hidden in the Spiritual Science that was brought to Earth by Heavenly Masters and that reveals a unique all-embracing Holy Truth. See also: <https://wisdomsfromheaven.com> and https://www.facebook.com/groups/806238039563401/?ref=group_header

In the ancient history, humanity already felt that there should be a Divine power which has created all life.

Through the search by man and sometimes inspired by Heavenly Masters, religions and spiritual currents arose, in which parts of that universal wisdom were revealed.

However, not all wisdom was understood and correctly interpreted. Mankind was not ready for it either.

Over the past century, under the influence of growing prosperity, scientific knowledge and freedom of thought, mankind is spiritual more developed.

There is also a growing understanding and inner feeling among many people that there must be one all-embracing Divine Intelligence, one Universal Truth, one Divine Cosmology. This awareness lies hidden in every person.

Therefore, listen to your mind and feelings and you will recognize this more and more within yourself.

The Wisdoms from Heaven from this book are based on the knowledge from the books of the metaphysician and prophet Jozef Rulof. Together with his Heavenly masters he was allowed to step out of his body and to visit the worlds after death as a spirit.

Here he was taught the Cosmic Laws, from which the Universe and all life was born, and which still control everything there is, visible and invisible.

Inspired by his Heavenly Masters, Jozef Rulof has written 27 books, in which this unique Knowledge is recorded.

Bram Maljaars

Lesson 11. With whom, where and how do we reincarnate

11.1 How long does it take for us to reincarnate again?

A soul that is not yet ready on Earth is attracted by the astral World of the Unconscious after leaving the body. In this world the soul resides in a kind of meditative sleep state, until the time when it is again attracted to a new life on Earth.

Because of the many murders that have ever been committed and have to be made good this world of the unconscious is overpopulated.

A new incarnation can take hundreds of years for these souls.

Source: Quotations from the books of Jozef Rulof

-Eighty years, according to the count of time on earth, have gone by and that is only a short time, for most stay hundreds of years in that world, before they are attracted back to earth.'

The Cycle of the Soul p. 307

-Stop murdering!

*Give a new organism to the soul,
thousands are waiting impatiently in order to be able
to continue the material life.*

Mask and men p.798

*-If we are now free from sins, faults, disharmony, sir,
then it could be possible, be possible.
But then it is a task, then I will come back immediately;
then you could be attracted in a short time, in seven months,
even in seven hours and be born again on earth.
balance with all the divine laws.*

11.2 With whom and where do we incarnate?

Question and Answer Part 2p.366 (Q2.14304.14306)

**In all of our lives we have had to deal with
thousands of people.
We have also lived in many peoples of the Earth
and have spoken many languages.
That is stored in our subconscious.
When we incarnate on Earth, we always end up
with people we know from past lives.**

Source: Quotations from the books of Jozef Rulof

*-Yes, madam, America, France, Germany, the jungle
and all the languages and all the peoples of the earth
who live in our hearts,
who are part of our subconsciousness.
Question and Answer Part 2 p.68*

*-By giving birth and creating we attract new life.
And we have to do with that life, or we
would not attract it.
The Cosmology of Jozef Rulof part 2 p.214*

*-It is therefore our grade of life, and no other,
which must elevate us at the moment of dividing,
because we belong to that core, that stage.
The Cosmology of Jozef Rulof part 2 p.200*

11.3 Return to Earth to perform a task

**Men can voluntarily incarnate from the
Spheres of Light
to perform a task on Earth.
Useful inventions and new healing methods are
brought to Earth in this way.
There are also Souls who voluntarily incarnate
to strengthen the good on Earth.**

Source: Quotations from the books of Jozef Rulof

*-If the soul has to return to the earth to make up for something,
it will take care of itself and those are God's laws.'
The Origin of the Universe p.392*

*-There are thousands of possibilities for us to return
to the earth, though for a fixed aim and that is achieved.
I know many scientists who are on earth and were born there
merely for an invention for the benefit of mankind.
The Origin of the Universe p.532*

*-This is also possible for other disciplines.
If the doctors did not return to the earth from this side to
leave something for mankind,
no progress would ever be made.*

*-From the moment when hell and the spheres of light
commenced, spiritual beings already returned in a
material organism and brought their
knowledge to the earth.*

11.4 Return from the spheres of Light to make something good or to experience something

**One can even incarnate on Earth from the First Light Sphere to make something good in combination with perform a task.
Even if the soul lacks a certain experience to continue in the spheres, there is the possibility to incarnate on Earth for this.
And always through the World of the Unconscious.**

Source: Quotations from the books of Jozef Rulof

-We can enter the first sphere on this side when we are free from hatred, passion and violence and already possess love, although we still have sins and faults that we can make up for only now.

*-Everything must and shall dissolve in the first sphere, André.
It is not until then that we can proceed.*

*And to that end many of them return to the earth?
Yes, André, to make up for the sins and faults and also to serve.
The Origin of the Universe p.531-532*

*-I told you of a mother who wanted to experience motherhood.
She yearned for fifty years and finally her prayer was answered and she was born again.*

*Those are wonders, André, God helps us in all these conditions and we must be grateful for that.
The Origin of the Universe p.509*

**11.5 Reincarnation from the dark spheres.
All souls evolve towards the Light**

**There are souls who have completed all their earthly
lives and yet have not developed love.
After their last life they are then attracted by a dark
or twilight atmosphere that suits them.
Sooner or later these souls also want to make good
everything and then they too can reincarnate on Earth.
There is no eternal damnation.
All souls evolve towards the Light.**

Source: Quotations from the books of Jozef Rulof

*-Reincarnation occurs from all transitions,
from those regions that are inwardly prepared.
Everyone who yearns to make up what he did wrong
can do so and returns to the earth.*

*-I'm going to explain that every being can
experience birth, reincarnation on earth,
if he really wants to.*

*-While on earth, it will irrevocably meet that
inner life to which it must make up.
The soul only returns to the earth for that purpose.
Thus, God comes to the aid of this life.
Millions of beings receive this mercy.
The Origin of the Universe p.507*

**Is the soul ready with its development on Earth,
then it is attracted by that astral sphere,
that fits the level of consciousness and Love that
has been achieved in all those lives.**

**A soul that is not yet ready on Earth is
attracted by the astral World of the Unconscious
after leaving the body.**

**In this world the soul resides in a kind
of meditative sleep state,
until the time when it is again attracted
to a new life on Earth.**

-Because of the many murders that have ever been
committed and have to be made good,
this world of the unconscious is overpopulated.

A new incarnation can take
hundreds of years for these souls.

-In all of our lives we have had to deal
with thousands of people.

We have also lived in many peoples of the Earth
and have spoken many languages.

-That is stored in our subconscious.
When we incarnate on Earth, we always end up with
people we know from past lives.

11.6 What do we know about reincarnation

They remember earlier times in which
they had a different body.
Yet they feel that they are themselves in that previous body,
but they then listened to a different name.

-Men can voluntarily incarnate from the Spheres of Light
to perform a task on Earth.
Useful inventions and new healing methods are
brought to Earth in this way.
There are also Souls who voluntarily incarnate to
strengthen the good on Earth.

-Men can even incarnate on Earth from the
First Light Sphere to make something good in
combination with perform a task.
Even if the soul lacks a certain experience to continue in the
spheres, there is the possibility to incarnate on Earth for this.

-There are souls who have completed all their earthly
lives and yet have not developed love.
After their last life they are then attracted by a dark or
twilight sphere that suits them.
Sooner or later these souls also want to make good
everything and then they too can reincarnate on Earth
and continue to develop on their way to the light.

The Society Wisdoms from heaven

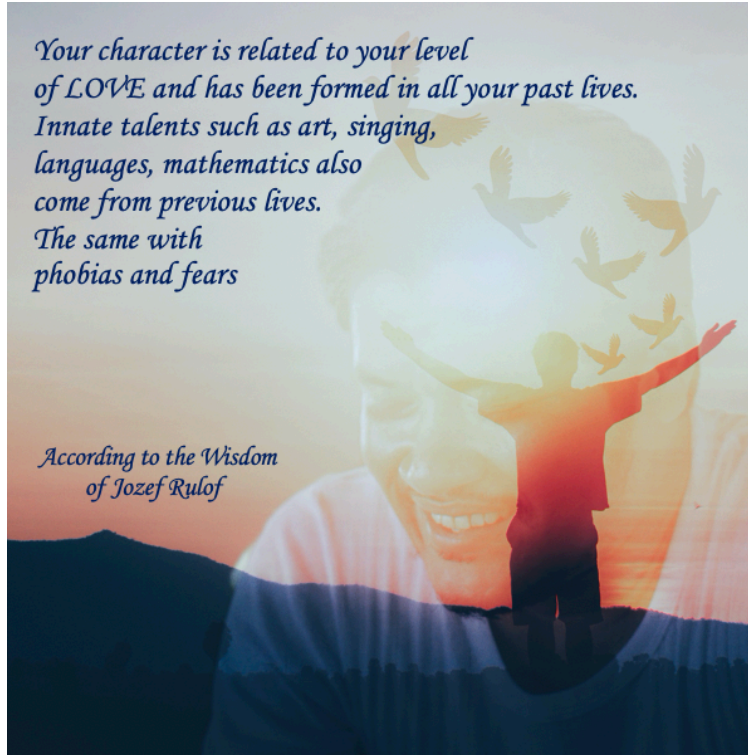

-Especially young children can sometimes still
remember previous lives.

[Memories of previous lives](#)

Lesson 12. Talent, character, emotional life, phobias and fears

*Your character is related to your level
of LOVE and has been formed in all your past lives.
Innate talents such as art, singing,
languages, mathematics also
come from previous lives.
The same with
phobias and fears*

*According to the Wisdom
of Jozef Rylof*

12.1 Memories of past lives

**We all know the experience, that it seems like you
have known a new person for a long time or
that a foreign country feels right at home.
Some people have also had visions or dreamed
about their previous life.
Especially small children can remember past lives.**

*Source: Quotations from the books of Jozef Rulof
-But a great deal of people received phenomena,
saw themselves again in those places and knew exactly,
what a city like that,
where they had never been before in this life,
looked like from inside and outside.
Question and Answer Part 1 p.293 (Q1.8833.8836)*

*-You will feel, our reincarnation, our previous lives
send us to dreams, send us to other countries.*

*-You stand before people and say:
'Good heavens, why do I know those people so well?
Why do I feel drawn to those people?'
Perhaps it is your child, your mother, your father.
Question and Answer Part 2 p.79 (Q2.2462.2464)*

*-Man on earth is unaware of all those lives
which is a mighty grace, for human strength,
our nervous system, is not designed to bear
all that sorrow consciously.
The Origin of the Universe p.411 (OR.11114)
See also: [Memories of previous lives](#)*

12.2 Talents such as art, singing, languages, mathematics

**Every innate talent for a science or art
has been built up in previous lives
through hard work.**

**The character traits that we get with the birth
are also built up in previous lives.**

**From the spheres of light one can reincarnate
on earth, to accomplish a task.**

**The higher the sphere of light, the greater the task
will be for the development of humanity.
On earth one sees a 'prodigy' being born.**

Source: Quotations from the books of Jozef Rulof

This is most clearly seen in children.

*On earth, these feelings are referred to
as talent, intellect, but that is not the truth.
The soul has acquired these qualities in the
previous life, or perhaps many lives ago.*

The Origin of the Universe 317, 318

*-You now draw from your previous life,
your French, your German and your Russian probably,
you have talent, that is also a part of it.*

Question and Answer Part 1 p.88

See also: [Aptitude and talent and gift](#)

12.3 Child prodigies

**We all know them, especially in music and art,
prodigies who already have an
amazing talent at a young age.
They have built up that talent in previous lives
and this is taken to the new life
with a new reincarnation.**

Source: Quotations from the books of Jozef Rulof
*-You now see that Mother Earth has not given you
all these grades of sleep for nothing.
For the West the subconscious is a depth in which
everything from previous lives lies hidden and
that which absorbs everything, which is experienced
during the life and serves as lumber, or the nervous
system would already succumb early.
And your child prodigies draw from this when they
are conscious of their skills at an early age and
want to start doing art.
Spiritual Gifts p.435 (SP.10877.10883*

*-It must not be so difficult now for you to understand why one
person achieves something and really gets it for nothing,
for which another person has to slave for. .(...)*

*-One person becomes an artist,
another person will never become one!
The feeling shows how far you have come for art.
Spiritual Gifts p.119
See also: [Child prodigy](#)*

12.4 Character and reincarnating emotional life, built up in many lives

**Our character is slowly formed in many lifetimes and because character traits reincarnate we do not have to start over in every life.
Only in this way can we build a strong and especially loving character.**

Source: Quotations from the books of Jozef Rulof

*-We see arts and sciences again, madam,
as a result of our emotional life.
We built up all our characteristics as a result of many lives.
And that goes slowly, we learn almost nothing in one life.
At least for the good.
Question and Answer Part 1 p.88*

*-If you love the life, then that character and
that personality will come of their own accord.
Question and Answer Part 4 p.385 (Q4.16330.16333)*

*-I can assure you that there is material inheritance.
However, not for the soul!
What does that mean?
That the soul is not given any thoughts or
power of feeling for its life on Earth.
Mask and Men p.858*

See also: [Character](#)

**Some people have a panic fear of fire,
for water, for small spaces,
for high altitude or only when
they are on the streets.
If nothing has happened in this life,
that can explain that fear,
then the explanation lies in previous lives.**

Source: Quotations from the books of Jozef Rulof

*-For example, we have people
who do not dare to walk in the street;
they were irrevocably killed in a
road accident or whatever.*

*-We have someone here amongst us
who cannot sit alone in a small house,
a closed space, then she becomes afraid,
then things almost burst.*

*That soul –I looked into that life,
and I saw it –
she was burnt alive.*

Question and Answer Part 3 p.181 (Q3.6144.6151)

See also: [Phobia and fear](#)

2.5 Phobias and fears from past lives

12.6 Stories from previous lives

Source: Quotations from the books of Jozef Rulof

*-After having experienced my final life,
I returned to life after death and saw into all my former lives.
I had lived lives in which I bore children and
possessed the 'Mother body',
so that I got to know the laws.*

*-In that life, I met a soul I had to make up to,
which I did with my own body.
That soul descended into me and I had to accept that
the mighty miracle became conscious in me.
In that life I served, could only serve, and I gave myself in it.*

*-In that life I experienced the mightiest miracle created by God.
This miracle happened in me, my soul passed into that miracle,
the young life arose from the darkness and became conscious
in me. In that life, I was 'Mother'.*

*-I saw many lives in which I experienced the law of
'cause and effect'.*

*- I experienced starvation and want, terrible pains,
sicknesses and terrors, which can be experienced on earth
when that life brings us slavery.*

*-I saw myself as a slave, was killed by others,
yet to die again on earth after having reached my age
and return to it. Again and again,*

*I was attracted towards the earth by two souls,
until there were no more souls on earth,
which I had to make up to.
And so I stood before my very last life on earth.
Between live and death p.346*

Free download the book: [Between Life and Death](#)

*-Another example. A lady comes to me.
She cannot – she told me – be in an enclosed space.
If this happens to her anyway, then she gets the feeling
that she is suffocating and she runs out the door.
There is nothing to be done about it, the doctors say.
Even though they stuffed her full of medicine,
it remains. Now what?
I got to see the diagnosis and her past life.
This soul as a woman was also mother then.
And in that life she was burnt alive.
Precisely because she had felt locked in and because
she did not see any way out, she lost that life.*

*-Since the doctors still cannot accept reincarnation,
they are powerless and just send those people away,
or give those patients medicine,
but it is the spirit and not the material!
-In this way I can analyse thousands of human situations
for you, because each phenomenon
has to do with our inner life.
Question and Answer Part 1 p.301 (Q1.9091.9113)*

Lesson 13. Gay. Lesbian. Ambivalent

13.1 Every soul will have to experience motherhood and fatherhood

The All-Source from which we were born as human beings is female and male, giving birth and creation. Our soul, as Divine spark, must evolve to be able to return to this Divine Source.

The Cosmic Laws of Fatherhood and Motherhood ensure that every soul will develop and experience motherhood and fatherhood.

These laws are reflected in everything in our daily life on Earth.

Source: Quotations from the books of Jozef Rulof

-God gave the human being fatherhood, motherhood, reincarnation.

The human being received that for nothing. That is the Divine core for the human being, for the animal, for the life in Mother Nature.

But the human being will now master that Deity, that is now the word. Lectures part 2 p.411

-You must accept that fatherhood and motherhood for the space and for all the life is the essential source as a result of which you evolve.

Lectures part 1 p.404

-These beings will enter the male and female body thousands of times. It is, as I said, to awaken, to experience the plan of creation.

The Origin of the Universe p.276

13.2 Homosexuality is the natural transition from female to male

There are seven different grades of life on Earth for fatherhood and motherhood.

Every soul experience seven lives of being a woman and then seven lives of being a man and so on.

In the transition from a female to a male body, the female feeling of the past lives prevails in the man.

That is why he still feels attracted to other men.

In the lives after, male feeling will continue to develop.

Source: Quotations from the books of Jozef Rulof

-We enter the male organism seven times like that, and then we come here and then we enter the maternal one again of our own accord, and then we are again in the maternal.

Question and Answer Part 1 p.17

-But homosexuality – science does not accept that yet – is only the returning of motherhood to fatherhood and the other way round, that means, that the soul-as-human being must experience both organisms.

-A woman now therefore lives in the male organism and still feels maternal, as a result of which she still therefore seeks the man.

But for society the man seeks the man.

If the soul comes from the male organism and if it is a woman for this life, then that human being no longer possesses the full paternal consciousness, but still feels like a man in the maternal garment and therefore also seeks the woman.

Question and Answer Part 1 p.91

13.3 The body is masculine, but the feeling is still feminine

All evolution in the universe is governed by the Cosmic Laws of Fatherhood and Motherhood. Homosexuality is thus a natural transition phase for humans, animals, plants and universes and is nothing more than unconscious fatherhood and motherhood.

*Source: Quotations from the books of Jozef Rulof
-But that therefore means that on earth seven different grades of life were born for fatherhood and motherhood. That fathers and mothers live in there who still do not possess the conscious feeling in order to give birth and to create, but that they can and also must master that feeling by means of the lives which come, it is only then that man and woman will consciously feel both father and mother and there will no longer be any question of homosexuality!
The Cosmology of Jozef Rulof part 2 p.198*

*-And we are all it. Everyone has to go through it. Because they are the seven grades for fatherhood and motherhood.
Question and Answer Part 4 p.97*

*-Also the animal, the flowers and the plants, ladies and gentlemen, and the universe also possess homosexuality, which – now comes the answer – is nothing else but unconscious fatherhood and motherhood!
Question and Answer Part 1 p.93*

13.4 Lesbian is the natural transition from male to female

**There are seven different grades of life on earth
for fatherhood and motherhood.
Every soul experience seven lives of being a man
and then seven lives of being a woman and so on.
In the transition from a male to a female body, the
masculine feeling of the past lives prevails in the woman.
That is why she still feels attracted to other women.
In the lives after, the feminine feeling
will continue to develop.**

*Source: Quotations from the books of Jozef Rulof
-But homosexuality is therefore nothing else
than that the spirit,*

*the soul as a human being, goes to the other body,
because we live in both organisms.*

*-One is a man, the other one is a mother,
but we enter both organisms. Clear?*

*And the world still does not want to accept that
but all of that will come soon.*

And that is irrevocably a divine law.

That can be seen and experienced in all the organisms.

*-That is not only for the human being,
but that is also for the animal world.
That reincarnation always continues.*

Question and Answer Part 4 p.17

13.5 The body is feminine, but the feeling is still masculine

**All evolution in the universe is
governed by the Cosmic Laws of
Fatherhood and Motherhood.
So being a lesbian is a natural transition phase
for humans, but also for animals,
plants and universe,
and is nothing more than unconscious
fatherhood and motherhood.**

Source: Quotations from the books of Jozef Rulof

*-And now that I know homosexuality, now that I know that
the man goes from the male...' the creating power,
gradually the personality lives in there seven times as spirit,
and then passes onto motherhood.*

*Then the human being has suddenly entered a body and
does not know what to do with it, still feels creative and
is left there with a maternal organism.*

*-Society destroys these people.
I do not, because we know the grades of these masks.
Those masks have been ripped off for us because the human
being as spirit, as soul, the soul of God as human being,
I will put it like this, lives in both organisms,
because otherwise life would be at a standstill.*

Question and Answer Part 4 p.80

13.6 Ambivalent is the result of a physical disturbance in the grow of fetus caused by man and woman feelings of equal force

LGBT. Each soul experiences seven lifetimes of being male and then seven lifetimes of being female and so on.

In the transition from female to male and vice versa, we see gay and lesbian. In this transitional area, the soul has female and male feeling forces, which are close to each other. It is likely that we should look for the explanation for the emergence of transgender, bisexuality, ambivalence ea also in these transitional lives. The books of Joseph Rulof describe that ambivalent is the result of a physical disturbance in the growth of the fetus, caused by the action of male and female feelings of equal power.

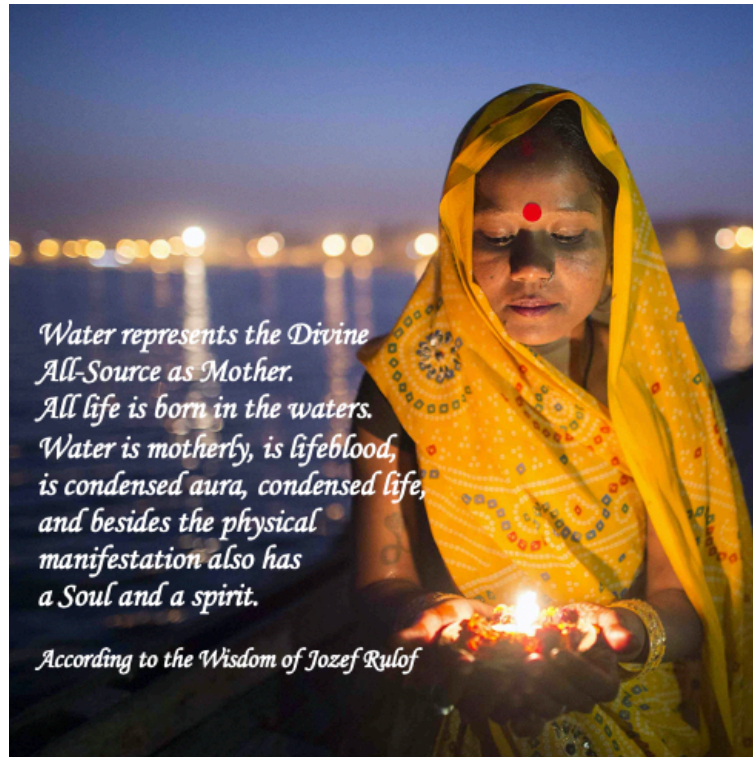

Source: In the books of Jozef Rulof the following is stated by the Heavenly Masters:

-They know that, you see, between the third and the fourth grade you get the formation of the organism, then you go from fatherhood to motherhood and now there is no feeling, no feeling anywhere. That is, they are neither father nor mother.

-And now that creation continues and has no form of existence, no influence, and as a result of this two feelings come about at the same strength, because they both live in the human being, and then those two gender states emerge and are at halfwaking consciousness in the human being.
Question and Answer Part 2 p.311-312

-If you start to analyse motherhood, fatherhood, homosexuality, maternal, paternal, cell power, cell consciousness, cell psychopathy, and start to analyse all those laws, you will need a book of five thousand pages, only about the birth of a child.
Question and Answer Part 2 p.101

Lesson 14. Water is conscious life and can communicate with humans

*Water represents the Divine
All-Source as Mother.
All life is born in the waters.
Water is motherly, is lifeblood,
is condensed aura, condensed life,
and besides the physical
manifestation also has
a Soul and a spirit.*

According to the Wisdom of Jozef Rylof

14.1 Water is compacted life air, life blood

When the Divine forces and laws revealed themselves in creation, the astral Divine Plasma mists from which the Water was born originated.

Water represents God as Mother.

All life is born in the waters. Water is motherly, is life-blood, is condensed aura, condensed life, and besides the physical manifestation also has a soul and a spirit.

Source: Quotations from the books of Jozef Rulof

-What is water? Condensed breath of life for all those lives!

An answer from the University of Christ!

The Cosmology of Jozef Rulof part 2 p.255

-And what are you now for my life? Condensed breath of life. Good heavens, André, that is the Divine answer, it is wonderful, because that is the truth.

After all, when we began with our life on our Mother, the Moon, the water became breath of life for all the life.

The Cosmology of Jozef Rulof part 3 p.61

-That is the most beautiful thing which you can give me, André. Yes, I am mother! But I am condensed breath of life for all my grades of life. I have become the maternal universe for my organisms. The Cosmology of Jozef Rulof part 3 p.64

-Water is life blood for everything.

For the human being, we have our different blood, but if there was no water in us, madam, then the blood would no longer have any meaning. But the essential source for our body is the life blood. For us and for the animal.

Question and Answer Part 3 p.115

14.2 Water is Holy Motherhood. All life is born in the waters

**All life has ever come from the astral All-Mother Plasma.
The first materialization were mists and water came out of it.**

**In this water, Mother Water, this astral life was
materialized as cell life.**

**The first cell life that was born was the human cells,
consisting of soul, mind and physical body.
When this cell life continued, the animal kingdom and
nature arose from the remnants of the human cells.**

Source: Quotations from the books of Jozef Rulof
*-But now the water? The water is 'motherhood', Mr Berends,
is mother for all life; also we people were born in the waters.
But from our life the animal king-dom received the own existence.
-Then we had already experienced our rst life as a cell, but had
even more energy in our organism in order to produce life,
but this was no longer necessary, because this experienced a
decay and look, a new life came into being and that became
the animal kingdom.*

Question and Answer Part 1 p.33

*-By means of me the animal has, the realm of colours has,
the ower and the plant life have received growth, blood circulation,
and heartbeat. Because the human being and all the life, André –
you saw that anyway – was born in the waters. Lectures part 3 p.335*

*-The human being who becomes conscious in this spac, thanks
Mother Earth and kisses her. This earth has a soul and a spirit, a
personality and possesses the Divine justice, because you get life
after life. She takes care of your sleep, she takes care of your food
and drink. Lectures part 2 p.147*

Man was once born as cell life in Mother Water and could evolve there and develop the water consciousness.

**The water is still very attractive to many people.
Sometimes one cannot resist that and then runs into the water and drowns**

Source: Quotations from the books of Jozef Rulof

-He says: "Yes, mother, I got to know your depth.

Everything is true. e human being and all the life was born by means of your life, mother. I can now prove that, I can explain that now. e human being, all the life of our Mother and Father originated in your life and received condensing and expansion by means of your giving birth. Lectures part 3 p.419

-Millions of people have felt the power of attraction of the water and jumped into it unconsciously, and drowned, of course.

There are people who, if the Moon is in the sky, no longer have any resistance outside and walk into the water of their own accord.

That is because we people were born in the waters.

The Cosmology of Jozef Rulof part 1 p. 71

-That is the natural hypnosis. Do you not believe in that?

Half of Egypt walked into it, into the Nile, and drowned themselves, because they heard the water speak.

That is the unity with the life of God.

And the water is God as mother.

Question and Answer Part 4 p.141

14.3 Many people feel strongly attracted to Mother Water

14.4 The eel must go to the womb of Mother Water to mate: the Sargasso Sea

Water as a whole is also a physical being with its own soul and spirit and also all vital organs that we find in man and in the entire cosmos. Water also has a womb.

The water life on Earth originated here.

On some animals, this womb still has appeal when they want to reproduce themselves.

The eel shows us the way to the womb of the Water, the Sargasso Sea. Also this mystery, which Earth science cannot explain, is thus solved!

Source: Quotations from the books of Jozef Rulof

-An eel in the waters crawls back, that great journey of the eel, and goes to the sea - and they do not know why those animals go to the sea - and they die for that.

-If you listen carefully now, ladies and gentlemen, this is a prophecy for the world, I have already known it for so long, Master Alcar showed me.

-That eel cannot originate in a secondary arm because that animal is an independence for giving birth, but finds the peace..., and the giving birth principle, and the entering, and the accepting and the receiving, happens precisely in the giving birth of the sea, and that is the womb of the waters. Because the mother is water, water is giving birth, is mother, so that mother must possess a motherhood somewhere and a womb; proof, that the human being has it, and all life has it, must also be a place somewhere in the waters where that actual giving birth lives.

Question and Answer Part 3 p.117-118

14.5 In ancient and Eastern religions, Mother Water is often Holy

**Mother Water represents God as Mother.
In the ancient Egyptian religion the priests heard
the water of the Nile speak and here they
sought the mystical unity with God.
In our time we see that in India, where the Holy Ganges
is worshiped as Mother.**

*Source: Quotations from the books of Jozef Rulof
-You innocent people, helpless children of Amon-Ré,
do not be ashamed, you will bear that, as a result of
which Mother Earth has created you.
She bore you and she knows your life.*

*She wants you to come to her, as during the first hours of
your birth, you are one in that.*

-Go into the Mother and surrender to her.

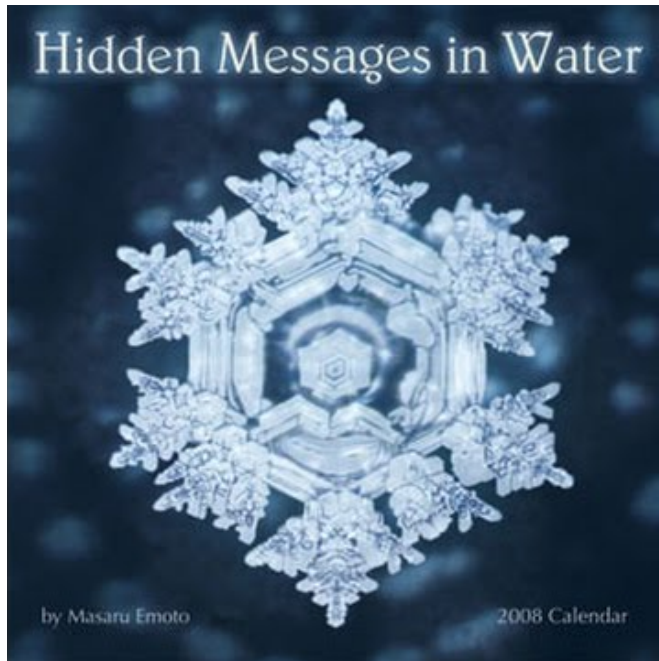

*The priests went into the water naked and then meditated
sometimes naked, if it concerned the development of the mediumship.*

*They went naked to Mother Nature and reached mystical unity
because of their pure meditation. For these séances,
they experienced the same laws, the contact with the Other Side.*

Spiritual Gifts p.51

*-Ramakrishna considered the waters sacred, he knows, and he
got to hear from that life that he can only now understand.
Yes, my brothers from the East, you went deep, you knew that we
were born from the waters, that the waters possess motherhood for
all the life of God. What does the sober West know about this
universe? Nothing.*

The Cosmology of Jozef Rulof part 2 p. 48

14.6 Water is conscious life and can communicate with humans

The Japanese scientist Dr. Masaru Emoto did experiments with water samples, which he first exposed to negative or positive words, thoughts, emotions or to different kinds of music. He then freed the water samples and made photographs of the water crystals.

To his surprise, the water samples that had been positively influenced produced beautiful crystals, while the negative influences resulted in ugly, deformed crystals.

Source: The Hidden Messages in Water. Masaru Emoto

Source: Quotations from the books of Jozef Rulof

- "After all, I am telling you, André, that I can warm up your life. And my life as space is from Him. My life is open to all the life of the earth and knows it too. But I am still not understood."

The Cosmology of Jozef Rulof part 1 p.73

- Looking into crystals is the perception of the original law, which Mother Nature also placed in the organism.

Looking into clear water is Oriental and the only thing that awakens the own sensitivity obtained.

The water speaks and because it is living, one life comes to the other and it is then possible in this way to be clairvoyant.

Spiritual Gifts p.310

- What is the clarity of that water?

- That is the spirit, that is the consciousness of the water.

- In this way the oxygen capacity - the lung, the lung system of the waters, is the oxygen - is the part of that water, in order to not make that rot, so it is the breathing.

Question and Answer Part 3 p.116-117

Lesson 15. The Creation of the Universe and the miracle of the expanding Universe

15.1 The All-Source for creation began was invisible silence, LOVE power

The All-Source before creation began was invisible silence, feeling, peace, darkness.

The All-Soul had not yet manifested.

The individual human souls were still an integral part of the

All-Soul. Then in that darkness comes movement, vibration, light, interspersed with periods of darkness.

The Heavenly Masters call this process the birth process of the All-Mother.

Through the two Cosmic Basic forces of giving birth and creation, Motherhood and Fatherhood, the All-Soul will bring all life to form and evolution.

Source: Quotations from the books of Jozef Rulof

-Everything which is now God, lived before Creation in a world of silence and peace, invisible, because there was still no conscious material life to be seen. But from that we came to life as human beings, also the animal kingdom and Mother Nature.

The Cosmology of Jozef Rulof Part 1 p.18

-At the beginning of creation there was darkness.

That darkness was in essence energy, and that energy God.

Invisible energy, therefore, which condensed into suns, stars and planets and revealed itself in man and animal.

But all that life is God. The Origin of the Universe p. 251

-When the creation still had to begin, when there was only life, people call that: protoplasm, aura. What is life?

It is the blood core, inspired by thinking and feeling, that is soul... that is spirit. Lectures Part 2 p.9

See the film: [1. The Origin of the Universe](#)

15.2 The ball of Divine light tears apart and spreads into the Universe

The birth process of the All-Mother experienced seven eras of development.
In the final phase, an enormous sphere of Divine spiritual plasma, trembling gold light, was created.
Everything was one more. Then the next phase starts.
The light mass tears apart and spreads into the Universe.
The All-Source has split itself into countless particles of condensed spiritual energy.
Each particle has a piece of the All-Soul and has a spiritual body and can now evolve as a separate form of life.

Source: Quotations from the books of Jozef Rulof

-You see, my brothers, that the All-Source as Mother opens itself and begins with creation.

-What you now see is therefore the life fluid of the All-Mother, and that means giving birth!

After this the spiritual evolution comes and that becomes the material world as a space. It is the universe in which you live.
The Cosmology of Jozef Rulof Part 1 p.21-22

-This tremendous creation had burst into billions of particles, The process of creation has begun: the origin of stars, planets and solar systems. What you see, are luminous balls of fire; but, in reality, this is God's own light and life; God's sacred radiance. The Origin of the Universe p.69-70

-You must see God as the life. at life came from that space, and there was darkness for the creation. An aura came, a working, that was the All-Source, the All-Mother.
Question and Answer 5 p.62-63

15.3 The Cosmic Motherhood sucks in its own plasma to one place

**First there was the All-Source as Soul and Life.
There came action and then the two Divine Basic forces
manifest themselves as spiritual plasma.
In the next phase, this mental plasma started to split.
This created millions of sparks as condensed spiritual energy.
The two Basic forces, Motherhood and Fatherhood,
now suck in the condensed spiritual energy each to their
own central point. Through this sucking in, Motherhood
forms a compacted astral sphere.**

*Source: Quotations from the books of Jozef Rulof
-What you now must accept, is that this motherhood absorbs the
own substance. And this absorbing already took millions of years,
according to this time and your calculation, before the moon
could begin as mother for this space.
Lectures Part 1 p.430*

*-And now we see that that aura, that plasma gathers itself and
sucks itself up as it were into one source, that pulls together.
And now we get... And that pulling together manifests itself
because that power there as mother and that space here as father
manifests itself and accepts the independence as mother.
We now see, we experience – we have to accept that – that in this
space, in this vastness there is nothing else than
fatherhood and motherhood. Lectures Part 1 p.427*

*-Now again millions of years pass.
Thus, in that atmosphere lives a glowing ball which remains
floating in it. From this, a planet will presently appear.
The Origin of the Universe p.71*

15.4 In the center of the Cosmic Motherhood, Mother Moon emerged

**In that center of Cosmic Motherhood,
the astral Mother Planet for the universe,
Mother Moon, emerged from that spiritual plasma.
Mother Moon represented the All-Mother, the expanding
Basic Force for all the life that would be born thereafter.
Much later, in seven eras of evolution, of ever-expanding
and densifying, the first material planet develops,
which we humans still know as the planet Moon.**

Source: Quotations from the books of Jozef Rulof

*-The Moon created the soul for the whole of this universe,
because she was able to divide herself,
all her life got an independence.*

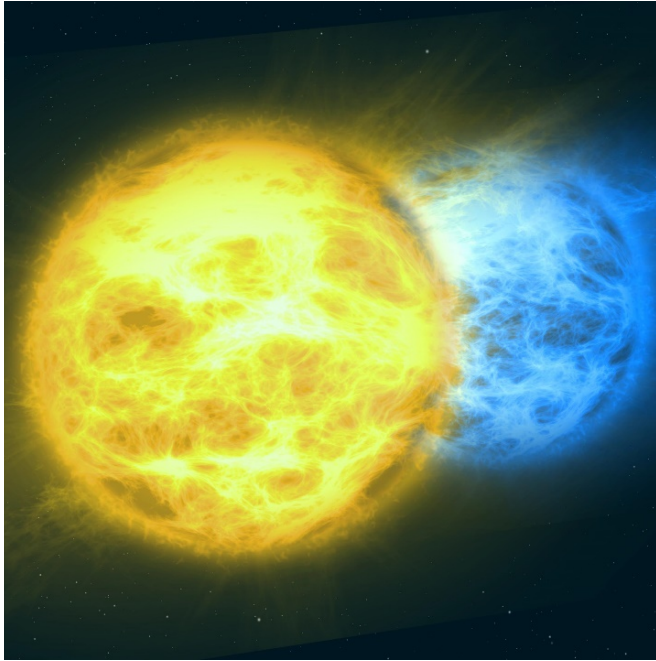

*So it can be experienced and established here
that all the life in this universe received the inner life by means
of the Moon as Mother.*

*-But people on earth do not know that and they are
revelations for the human being.*

*Every other planet created the organism, but by dividing herself
the Moon as Mother gave the own 'self' to all millions of sparks!
The Cosmology of Jozef Rulof Part 1 p.138-139*

*-The life is God! And this life will create and give birth.
The spiritualised and materialised life was born from a source
which we see and experience here as the Primal Source.*

*And that life was called God by the Masters!
The Cosmology of Jozef Rulof Part 2 p.131*

15.5 Cosmic Fatherhood and Motherhood, Sun and Moon, create life

The second Divine Basic-force, the Cosmic All-fatherhood, the creative and densifying Force, bundled in a shining astral sphere of energy- plasma.

In that spiritual plasma the first astral star was born: Father Sun. Father Sun represent the All-father for all the life that was to be created in the universe.

New life was born through the amalgamation of Fatherly energy with Motherly energy.

At the heart of the astral Motherhood the biological life of humans, animals and plants awoke.

And in the expanding Universe, new planets and stars were born.

Source: Quotations from the books of Jozef Rulof

-Sun and Moon were able to condense themselves for the first time with the origin of the creation and motherhood continued to accept that warmed plasma, but by means of this the life condensed itself in an embryonic state.

The Sun as the paternal authority emitted that power and the Mother as the First Cosmic Grade of Life absorbed that sacred working into herself.

-Fatherhood and motherhood are one, that space continues, more and more life comes.

Lectures Part 1 p.410

-By means of that Sun and Moon are one life, they are twin souls.

The Cosmology of Jozef Rulof Part 1 p.190

15.6 The birth of Mars, Earth, stars and planets. The Expanding Universe

What our earthly science calls "Big bang" and "Expanding universe" is nothing more than a simple description of a material process of creation. Heavenly masters, who are many lives further in their evolution, describe in the books of Jozef Rulof how the Divine All-Soul reveals itself at the level of Soul, Spirit and Matter, as the start of a Divine evolution process. The human Soul is an evolving life-form of the All-Soul. Human Soul and all Life must go through seven evolutionary phases before the Divine All is achieved. The first three are in our universe with the mother planets Moon, Mars and Earth.

*Source: Quotations from the books of Jozef Rulof
-In this aura, in this eternity of the universe stars and planets condense themselves. Lectures Part 2 p.15*

-All objects have their own atmosphere; that power emanated from them, and it is also the protection for this awe-inspiring wonder, which also encompasses the way planets, stars and other objects have assumed their own orbit. The Origin of the Universe p.71

-God created three following grades of life for this space.

As main planets these are: Moon, Mars and the Earth.

They were connected to each other and accepted this Cosmic unity.

-Because of this, my brothers, we see that the universe will create and give birth to new life, and that means, that more universes will originate, and so this universe still cannot be the Divine All.

This life is still not that far! But soon we will see those worlds.

They will then be the Fourth, Fifth, Sixth and the Seventh Cosmic Grades of Life, the Seventh of which represents the Divine All.

The Cosmology of Jozef Rulof Part 1 p.96

Free download the book: [The Origin of the Universe](#)

Lesson 16. The Creation and the Evolution of man

*Because this was the cell as human being, with a little tail
as we see a little fish like that.
And that head, that little ball, that little body possessed
everything: material, soul, spirit, and feeling.*

Jozef Rulof:

16.1 Before creation the human soul was part of the All-Soul

Before creation began, individual human souls were still an integral part of the All-Soul. Then the All-Soul split into countless particles of Divine spiritual plasma.

Our human soul is a Divine spark of life, an independent spin-off from the All-Soul and therefore also has the same drive to evolve.

We later find this drive to evolve in every form of life in the cosmos.

You could say that man is a stage of development of the All-Soul.

Source: Quotations from the books of Jozef Rulof

-Before the creation began – I explained to you – there was only emptiness, but that emptiness was the All-Soul, the All-Life, the All-Fatherhood and the All-Motherhood.

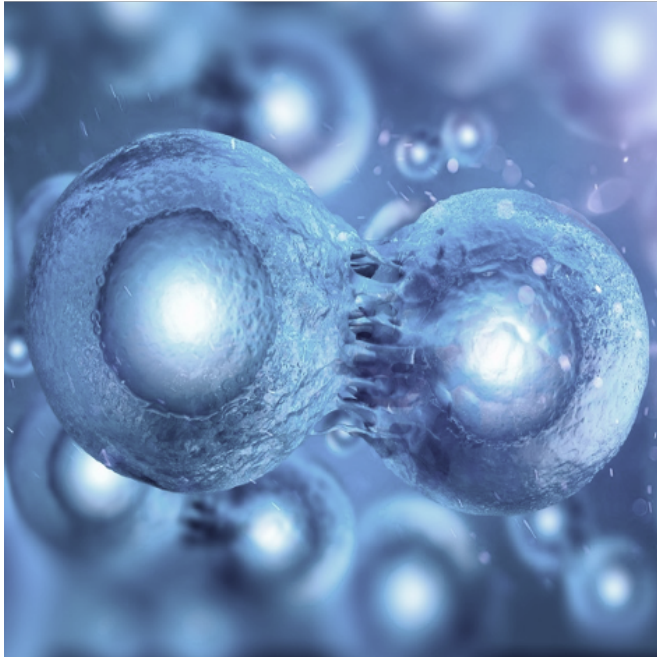

Lectures part 1 p.423

-And then I can now make thousands of comparisons, because that All- Source is in you, lives in the human being, lives in the plant, lives in the waters, and lives in nature. Everywhere you see that All-Source again. Lectures part 3 p.86

-But I am All-Source, I am All-Light, All-Life, All-Spirit, All-Fatherhood, All-Motherhood, All-Just, I start to feel all these laws, these powers, this inspiring plasma lives in me. I now feel that I was born from all of this.

Lectures part 3 p.72

See the film: [1. The Origin of the Universe](#)

16.2 The birth of the first human cells

At the beginning of creation, the All-Motherhood formed a sphere of spiritual nebula plasma, in which the first planet, Mother Moon, came into being. In here billions of god-human cells separated. Small translucent droplets made up of plasma and soul. These cells formed pairs and connected.

Each cell gave a part of itself to the other, from which a new cel grew. The new formed cel then split into two children cells.

These had got enough power to grow to maturity, but not enough to reproduce. For this they needed the power of the parent cells, which had died in the meantime and waited in the world of the unconscious.

Their souls connected with the children's process of reproduction and inspired the new fruit, which also split in two cells. A process that we still see in the human womb here in our time on Earth. Then this process of reproduction was repeated, in which parents and children reincarnated together.

Source: Quotations from the books of Jozef Rulof

-Those first cells came back and they experienced this bearing and creating process and those two cells produced new life and that father and that mother now enter that second embryo.

Therefore the children produce and the father and mother inspire the new life, the new birth. Lectures part 1 p.61

-God gave himself to all the life!

Of course also His character traits and characteristics, His Personality. And hereby all the Divine gifts.

The Cosmology of Jozef Rulof Part 2 p.129

See also: [Film + Article: Our first lives as a cell](#)

16.3 The evolution of man in the waters of Mother Moon

In this way, billions of human cells were born on the first planet, Mother Moon, and kept splitting up and attracting souls waiting for reincarnation. Only after seven lives were the first souls mother or father. Afterwards this changes after seven lives, so that the soul learns to experience both Basic Forces: Motherhood and Fatherhood. The pairs of cells born in Mother Moon are so called twin-souls. Through fatherhood and motherhood and reincarnation, in millions of lives, the cells go through seven material degrees or seven levels of development. From cell to fish to sealion-like creature, crawling out of the waters and dying. We see this development in seven grades of life on every planet again, for humans as well as animals and nature.

Source: Quotations from the books of Jozef Rulof

-They are now those twin states. Can you say twin souls?

Yes, souls originated from one source, from one cell.

Question and Answer Part 3 p.120

-Because this was the cell as human being, with a little tail as we see a little fish like that. And that head, that little ball, that little body possessed everything: material, soul, spirit, and feeling.

Lectures part 2 p.31

*-And then the human being had experienced the moon as a fish
- we crawled from the waters and wanted to go further, but that was precisely the border and the final point of our life, and then death came there, the releasing of the inner life of that fish, that seal which we were, or sea lion.*

Question and Answer Part 3 p.97

16.4 The start of the evolution of man on the land

The souls, who were ready on the Moon, were then attracted to a astral planet of the 2nd Cosmic grade of life.

Here they had to start again as a cell, because there was no larger body present yet. They rebuilt their bodies from cell to sealion-like organisms, crawling on land.

But this time also a land-form followed.

The second planet had received a stronger compaction from the Sun. Later souls could immediately incarnate in a sea lion-like organism, which was in line with the last level of feeling of their soul.

Source: Quotations from the books of Jozef Rulof

-Can you feel now that the soul now falls asleep and must return to the embryonic stage?

Its fish consciousness sinks back to the first stage for the birth and will disappear from this universe, because, we experienced that a moment ago, our following stage is ready.

The Cosmology of Jozef Rulof Part 3 p.165

-Soon we will begin with our first birth, so precisely on the Moon, however, with that difference, we have experienced millions of lives, we possess higher evolution and will go continually further in order to conquer this universe, which is possible!

We go from planet to planet, so bodies, which will serve us.

The Cosmology of Jozef Rulof Part 3 p.166

16.5 The human being evolves on multiple planets and achieved the mother planet Mars

The soul thus continued to build the rural body on six more transition planets and on the mother planet of the Second Cosmic grade of Life: Mars.

Guided by the Divine laws of life, human life evolves from single-celled organisms in the waters to ultimately coarsely built, still unconscious, large human beings who lived on land. The creature was able to move and had to look for food to satisfy hunger. In this way this being developed feeling and instinct. Here the human soul also developed a first form of spiritual emotional life: the pre-animal consciousness.

In the wake of humans, the animal world and nature developed in a similar way.

Source: Quotations from the books of Jozef Rulof

-We experienced six transitions and all those planets lie spread out in the universe, the origin of which you analysed in the books.

We now see that the universe can experience one process and that is fatherhood and motherhood.

And those laws serve, work on the human organism, we cannot experience anything else, but by means of that the soul awakens, the spirit, the inner life for all these systems.

The human process of origin now gets a form and that is the Human Being! The Cosmology of Jozef Rulof Part 3 p.194

The being living here has passed on to the next negotiable planet. It has, therefore, reached its form of existence, it is already mature and is ready for a higher stage. They are all giants.

These giants also lived on earth during the earliest of times.

The Origin of the Universe p.153

See the film: [2. The Origin of Man](#)

16.6 The Earth and then, together with the twin soul on the way to the Divine All

**After Mars the soul goes over to the 3rd Cosmic grade of life.
Six transition planets, scattered far in the universe
and the Mother Planet Earth.**

The Earth then consisted of a spiritual substance. The first souls had to rebuild their human bodies completely from cell life in the waters to humans on land. Later souls incarnate directly into a human embryo. After Earth, the soul, along with the twin soul, continue into the Celestial realms and then to the first planet of the 4th cosmic grade of life. That planet is in a different universe, which consists of a rarer substance. Then every soul will have to acquire the 5th, 6th, and 7th Cosmic degrees, before being absorbed in Divine All.

Source: Quotations from the books of Jozef Rulof

-The time will come when mankind and animals will leave the planet earth, but all those who have reached the highest degree of life we shall see again in our life, the life of the spirit.

All these beings will leave the earth and will pass on to the fourth cosmic degree.

The Origin of the Universe p.85

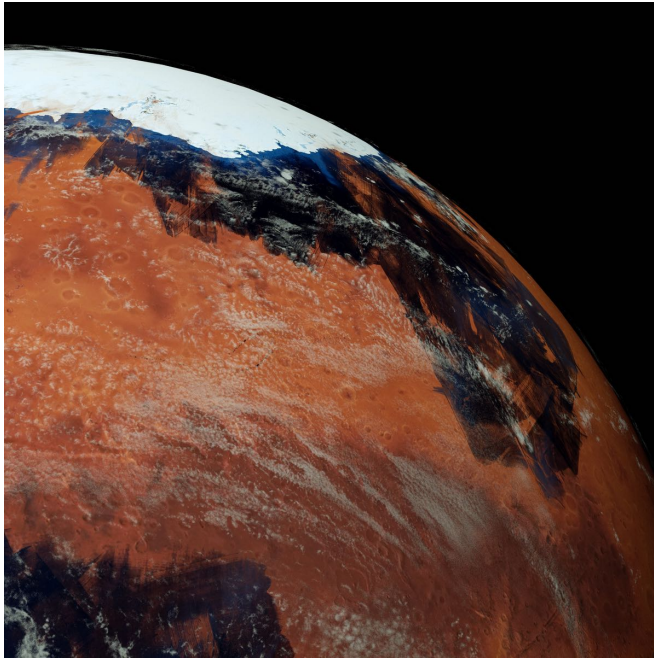

-This wonderful universe, which the human being sees from the Earth, is only fatherhood and motherhood and nothing, nothing else! And the human being must master that fatherhood and motherhood, for which the child of God gets to experience millions of lives.

And reincarnation lives beyond that, also for Sun and Moon, for this universe, so that we can and must accept that the Fourth Cosmic Grade of Life was really also able to materialise and spiritualise itself. The Cosmology of Jozef Rulof Part 2 p.225

See the film the 4th Cosmic degree: [4. Our Cosmic Destiny](#)

Lesson 17. Primordial humans once lived on Mars

17.1 Once, billions of years ago there was life on Mars!

In 2018, NASA announced that Marsrover Curiosity had found organic molecules in the three billion-year-old sedimentary rocks on Mars and also methane in the atmosphere. The discovery of organic material may indicate that there has been life on Mars, but it is not the proof of that, according to VTM.

Source: Science 08 Jun 2018

Source: Quotations from the books of Jozef Rulof

In the 1930s, Jozef Rulof (1898-1952) already gave a detailed description of the life that was once present on Mars. Billions of years ago, when life on Earth was yet to begin, there was already life on Mars.

Source: The Origin of the Universe from Jozef Rulof:
see also; [The Origin of the Universe](#)

The metaphysician Jozef Rulof was able to step out of his body and was then shown around by his heavenly masters in the astral worlds of after death. His Masters also showed him the life of humans, animals and nature, as it was born billions of years ago from the Divine Basic Forces and then evolved on Moon, Mars, Earth and intermediate planets. (see also Lesson.15 and 16)

-God created three following grades of life for this space.

As main planets these are: Moon, Mars and the Earth.

They were connected to each other and accepted this Cosmic unity.

The Cosmology of Jozef Rulof Part 1 p.96

17.2 Life on Mars began in the waters

All life was once born from the Divine basic forces on Mother Moon.

Here human and animal life evolved from cell to fish and then to a sea lion-like creature that crawled out of the waters and eventually died on land.

(See also the lesson 15 and 16)

From here life continued on six different transition planets before sufficient land consciousness was developed to be able to inhabit the seventh planet, the mother planet: Mars.

On Mars, humans and animals rebuilt their bodies in the waters, from cells to sea-lion-like organisms, crawling on land, but this time a rural form also followed.

Later souls were able to incarnate directly into an organism that matched their last level of feeling.

Source: Quotations from the books of Jozef Rulof

*-Soon we will begin with our first birth,
so precisely on the Moon, however, with that difference,
we have experienced millions of lives,
we possess higher evolution and will go continually
further in order to conquer this universe,
which is possible!*

*We go from planet to planet, so bodies,
which will serve us.*

The Cosmology of Jozef Rulof Part 3 p.166 (C3.4771.4777)

17.3 On Mars, human and animal developed primitive land consciousness

Our Universe has three Macrocosmic degrees of life with the mother planets: Moon, Mars and Earth respectively.

On all these planets the evolution of material life began in the waters.

Controlled by the cosmic laws, life on Mars evolved from single-celled organisms in the waters to ultimately grossly built, unconscious, large human and animal beings, living on land.

Source: Quotations from the books of Jozef Rulof

-So, laws of life and grades of life were born for this universe which would serve us as human beings.

We lived in the waters on the Moon, Mars already gave us the land consciousness, and Mother Earth the perfect one for this universe, because she got hold of that task by means of Sun and Moon.

The Cosmology of Jozef Rulof Part 1 p.105

-You see, André, the animal has now hardened.' 'Is that a tortoise, Alcar?' 'Indeed. But the animal is in the first stage of development. It is enormously large, but it will discard that size on earth.

The Origin of the Universe p.174

-So these three macrocosmic grades of life now work on the human life, the animal life and the plant life", so for the human, animal, maternal independence as organic life. The inner life expands itself and becomes the life of feeling and the personality.

Lectures Part 3 p.210 (L3.5705.5706)

17.4 On Mars men and animal life experienced the giant stage

Everything that lived on Mars, humans, animals, trees and plants was roughly built and huge to see. You could call this age the giant age in the material development of life.

When this life was finished with its development on Mars, it died out here and moved to Earth via six transition planets.

In the prehistoric period on Earth we saw many influences of that giant stage again, as it once looked on Mars.

Source: Quotations from the books of Jozef Rulof

-The being living here has passed on to the next negotiable planet.

It has, therefore, reached its form of existence, it is already mature and is ready for a higher stage. They are all giants.

These giants also lived on earth during the earliest of times.

The Origin of the Universe p.153

-Look at these jungle people, this animal-like being, and you will see your prehistoric age for this planet, soon you will see yourself again on earth, and it is only then that you will be able to accept that the universe was created for the human being.

The Cosmology of Jozef Rulof Part 3 p.197 (C3.5544.5548)

-Mars produced seven subsequent grades of life, but we got to know those laws for the All-Mother and they are still present.

Now we experience those laws of condensing by means of the human organism.

The highest and seventh grade of life now, dominates the grades living under that here, but all those millions of people live spread out across the planet. Of course, the life here is rough and harsh, but what were the prehistoric ages on earth like?

The Cosmology of Jozef Rulof Part 3 p.197

17.5 The primordial man on Mars was primarily focused on animal food

The primordial man, as he was living on Mars at the time, was primarily focused on animal food. There was also cannibalism, other people who were killed were just eaten. There was also plenty of vegetable food on land and in the waters.

There were plants with leaves the size of a house roof. There were also huge bushes with fruits that both humans and animals could feed on.

Source: Quotations from the books of Jozef Rulof

-Trees and plants are also immensely large, although plant life dominates here. The leaf of a plant, as you see, is as large as a roof of a house on earth and is very thick.

-The enormous shrubs you see here everywhere, produce a kind of fruit on which the animals, that have reached the shore, feed.

There is similar food for man here, which is only present periodically, depending on the climate.

They do eat this kind of food, although they are adjusted to animal food. In the water and on land, food is abundant. In addition, there is the human being itself, which they eat.

The Origin of the Universe p.155

-We now see that the universe can experience one process and that is fatherhood and motherhood.

And those laws serve, work on the human organism, we can not experience anything else, but by means of that the soul awakens, the spirit, the inner life for all these systems.

The Cosmology of Jozef Rulof Part 3 p.194

17.6 The human being developed on Mars a form of primitive feeling and instinct; the pre-animal-like consciousness

The human being on Mars was able to move forward and had to look for food to satisfy hunger.

Husband and wife reproduced like animals, without understanding what they were doing. They were big powerful creatures, wild and savage. There was no language yet.

What could not protect itself was finished and just eaten. Only the law of the strongest applied here. Nevertheless, through this way of life, a first primitive form of feeling and instinct developed: the so-called "pre-animal-like consciousness."

Source: Quotations from the books of Jozef Rulof

-Alcar descended on the second cosmic degree. They had been here where those enormous pre-animal-like beings lived.

'There, in front of you, you see man who lives here.

He has the pre-animal-like consciousness.

-Here, André, as I said before, manslaughter and violence dominate, for pre-animal-like consciousness has awakened.

-André looked at this human being; he lay down to sleep.

He was entirely naked and hairy like an animal. His body was large and strong. A giant on earth was a dwarf as compared with him.

The Origin of the Universe p.226 and 229

-André saw human beings. My God, he thought, is that man?

They were worse than predators. They were wild and savage, large powerful beings, and they radiated a primal strength which made him shiver. He saw hundreds of these beings together.

He heard them speak, but it was not speech, it was terrible shouting.

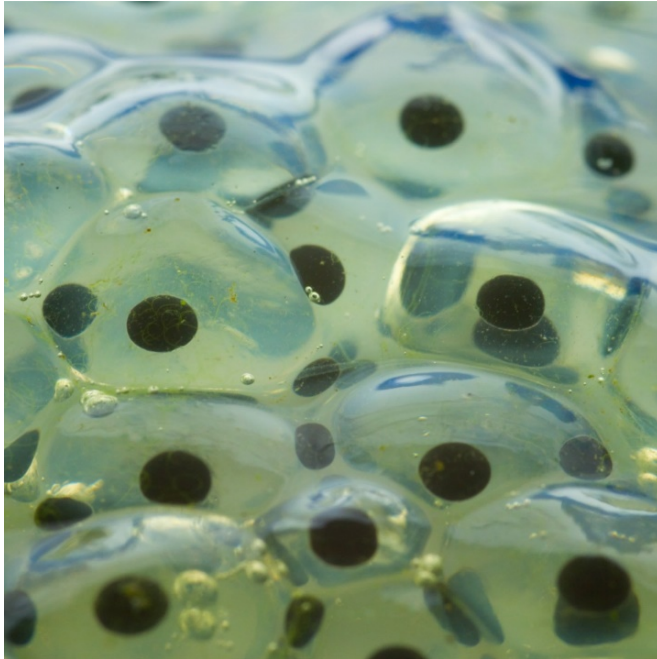

The Origin of the Universe p.149

Lesson 18. Birth and evolution of animal and nature

*Really from this first human embryonic cell,
by means of this first death for the embryo,
from there, by means of this evolution process,
the animal was born.*

Jozef Rulof

18.1 The life of animals was born from the slimy remains of the first human embryonic cells

Once, life on Mother Moon began with the formation of the first god-human embryonic cells. From this the human cells were born and when these continued with their evolution, those embryonic cells were not yet worn out. These cells had seven degrees of compaction to create and give birth and from the remaining cell material the animal world was born and later nature. The animal is therefore born from the first god-human embryonic cells, has gained its own independence and, just like humans, consists of body, mind and soul.

*Source: Quotations from the books of Jozef Rulof
-But that first human ego, that first human embryonic cell had not lived it out. That cell reaches creating and giving birth, but it has seven depths as worlds, it is not dead.
Lectures Part 2 p.57 (L2.1452.1453*

*-He saw that this tiny body dissolved into a slimy condition. Out of this process, however, something came to life, although it could hardly be seen. Yet, however tiny it was, this little decaying cell produced little animals. Out of the first human peel, to put it that way, hundreds of animal lives emerged.'
The Origin of the Universe p.210-211*

-If these cells get to accept the process of dying, then a rotting process will come. From that we already know that by means of this the animal world was born, and then the following laws of condensing emerged and we see Mother Nature beginning with her own evolution. The Cosmology of Jozef Rulof part 2 p.128

18.2 The ape was the first animal species to emerge from human remains

The first animal life that emerged from the human cell has evolved into the ape species.

Of all the animals, the monkey most closely resembles humans.

We also see human traits in the monkey's behavior.

On the land the ape is the shadow of man.

There are different animal species that have a kind of human feeling such as the dog and the horse.

But nevertheless, they will always remain one degree below the human emotional life, because from birth they have been given one degree less conscious life.

Source: Quotations from the books of Jozef Rulof

-André, we said before: the chimpanzee is the closest to you, it has the most consciousness, it has your arms, your eyes, as shadows. Lectures Part 2 p.57 (L2.1460)

-Every grade, an ape, has seven branches, transitions, before you enter another, lower grade again. And in this way there are seven times seven, so forty-nine different species, which all give birth and create and represent an own world, and give birth to, create new life. Just go into that.

Then you will see such apes, so big, and you will see them almost half the size of a house, those gorillas.

Question and Answer Part 3 p.158

-The ape experienced seven transitions and it was only then that new life came from that cell and are now all those millions of species of animal which the earth possesses!

The Cosmology of Jozef Rulof Part 4 p.206

See also the article: [The mistake by Darwin](#)

18.3 Animal life evolved into a multitude of species. The horse is the highest developed animal specie

The animal life that was born experienced the same laws of paternity and motherhood as the human cells. But unlike the human soul that has followed one physical evolutionary line and expanded its body from single cell to our current human form, animal life has split and branched into a multitude of animal species as seen on Earth. The horse is the highest developed animal specie. It is serving from nature.

*Source: Quotations from the books of Jozef Rulof
-Isn't it true, that can be experienced, seen and followed here, we had to accept those laws; from the human cell, the material self as they call that, the first human material skin, seven animal grades of life emerged and that became the animal world, and it is only then that Mother Nature began.
The Cosmology of Jozef Rulof Part 2 p. 214*

*-But man, as I said before, followed only one way, leading towards perfection of the material organism. The animal being, however, evolved through thousands of animal species. It accepted one life, in order to enter a higher stage in the other, but remained through all those mil lions of years, one degree below the thinking and sensing being, which will ultimately return to God.
The Origin of the Universe p.91*

-But a horse is serving with regard to every human thought, whatever it is like. A horse is the highest animal being in nature, because it does more than your cow; even if you eat your cow, and your milk, and everything. But the horse still serves, still pulls, does that, does this. Question and Answer Part 6 p.303

18.4 The seal has a certain degree of human feeling and thinking

The seal followed man in the waters and even has a certain degree of human feeling and thinking!

Other animals in the water, such as the sea lion and the dolphin, also closely approach man.

In the seal we also see human traits.

Source: Quotations from the books of Jozef Rulof

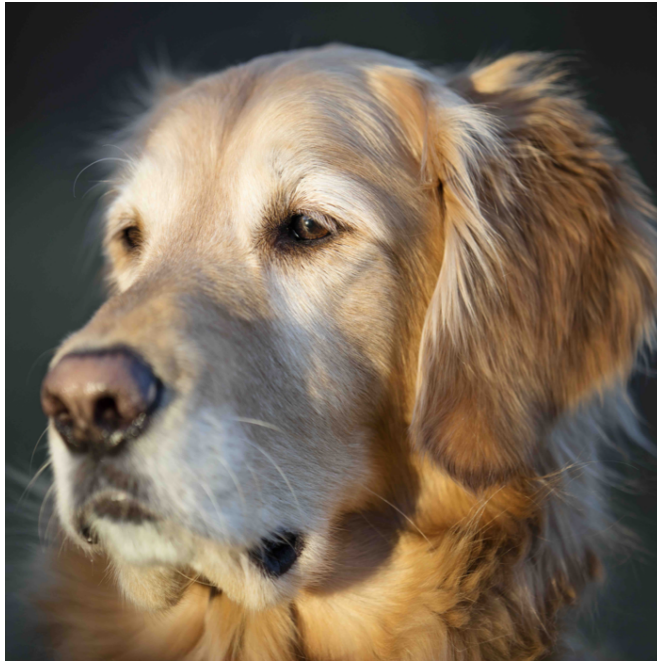

-I recently gave you a picture that in those types not only the ape but also in the waters your own life can still be seen.

-But you also have your sea lion and seal, which follow you in the waters and really already possess human thinking and feeling, so purely to attunement, that every independence had to give birth to, had to divide itself.

And as a result of this you now have your fish to eat and to drink, but also the animal direct attunement as a fish stage of the human being.

-And then you see a seal lion and a seal, which as water life and land consciousness represent exactly one world, but different organic life.

Lectures Part 2 p.32

**18.5 In the evolution of the soul the animal follows man,
but it does not get the highest consciousness**

The animal, but also the plant, has acquired its own independence and, like man, consists of body, mind and soul.

Some animals such as the horse, the dog and the cat even touch the human emotional life. Yet there is a big difference.

The animal follows its intuition in its actions.

However, man has a free will, can think and make choices, and only man will ever develop the highest consciousness.

Source: Quotations from the books of Jozef Rulof

-When I speak of intuition, I can say the animal has that to a high degree. The animal surrenders unconditionally and follows its intuition, its senses, and lives. Man, however,

was given a will of his own, he is like God; he is a Divine being.

And as man is a Divine being, he has to follow one course, whereas the animal proceeds through thousands of material organisms. The Origin of the Universe p.89

-Invariably, in all those millions of centuries, this animal being followed man, but it proceeded below the strength and mental degree of man.

The Origin of the Universe p.89

*-I told you and was able to explain and you can accept this:
the human being is a Deity.*

For God, for the All-Source, the All-Life, the All-Soul, the All-Spirit, the All-Plasma, the All-Fatherhood and the All-Motherhood the human being is a Deity. All the life, flowers, animals, plants, spaces are all sparks of His personality.

Lectures Part 2 p.363

18.6 Snake and crocodile are post-creations and remain on Earth

In the animal and plant world we know post-creations. When the actual grade of life of that species was finished, there was still life left, that continued to create. This form of life belongs to Earth, is temporary and does not manifest itself in the Spheres of Light. Well-known post-creations are the snake and the crocodile, but also the entire insect world and even part of the flower world is post-creation. Even our Universe has a form of post-creation; the Milky Way

Source: Quotations from the books of Jozef Rulof

-For example, we never see all the insects, also those beautiful little butterflies, again on the other side, because those species of animal belong to the post-creation, just like snakes, crocodiles and for the waters ink fish.

-Millions of species of little creatures and animals were born as a result of the post-creation, of which we do not see a single inner life again on the Other Side, because what would we do with lice and fleas there, to just make it clear to you at once.

Question and Answer Part 1 p.32

-A snake, an insect. Water-like and land-like life, have attunement to that post-creation and we never see this in the life 'beyond the coffin'. Such life is temporary and has no conscious life for the 'All-stage'! Question and Answer Part 1 p. 245

-After all, the Milky Way which people talk about there, are meaningless suns together. They are millions of suns and are post-creation, they are crumbs of the whole universe.

-So the Milky Way is the remaining life of the universe.

The Cosmology of Jozef Rulof Part 1 p. 83

18.7 The bird originated from animal life and already has on Earth spatial consciousness for the animal

In the evolution of the animal, the sea lion represents the aquatic consciousness and the monkey the land consciousness.

But the animal kingdom also knows the birds, they can rise up from the land and represent the next phase of the animal's evolution: spatial consciousness.

Thus, the animal kingdom on earth has already shaped the next stage of evolution.

Man will only acquire the spatial consciousness, the spiritual wings in the spheres of Light.

Source: Quotations from the books of Jozef Rulof

-All life reached becoming conscious in the waters. Can you feel it?

Therefore, also the human being. And now you get the land consciousness, the water consciousness and the spatial consciousness. The spatial consciousness releases itself from the animal grade and that is the winged animal species.

Question and Answer Part 5 p.28

It begins there. So, in the waters, so half-water-like, half-land consciousness, and then gradually winged on the land, and the animal goes into the universe. Question and Answer Part 6 p.256

-That animal must come back, must evolve and will probably also come back in different breeds for this breed of dog, animal-like consciousness. But one day it will fly into the universe, the animal, the dog, the cat, the tiger, the lion, every animal species gets spatial consciousness. And what is that?

I told you that, that is the winged sort.

Question and Answer Part 5 p.178-179

18.8 Mother Water gave birth to fish life, but its core came from humans

All life was originally born in the waters. When humans and animals had left the waters, creation simply continued and fish and post-creations were born in the waters, which were an important source of food for humans and animals. Mother water gave birth to this life, but the core of it came from humans. Mother Water as a whole is also a physical being with its own soul and spirit and also all the vital organs that we find in humans and throughout the cosmos. Water also has a womb. See also Lesson 14.4

*-We see now that both the human being and the animal left the waters.
-You see that the waters also reached that consciousness, that independence will also give birth and create, by means of which a fish is born and later the post-creations.*

The Cosmology of Jozef Rulof part 4 p.2018

-But Mother Water, that is motherhood, produced own life through us, because we left the cores for that behind. Question and Answer Part 3 p.39

*-The fish originated as a result of my kidneys, spinal cord, the glands, as a result of my blood. We even know fish, who possess the menstruation and therefore still possess fully-maternally the human characteristics!
-And this became the fish in the waters and all those lower species, until there was nothing more to create; then that giving birth was worn out and that creating and giving birth finished, which we now also have to accept for our life, but not for Mother Nature.*

Question and Answer Part 1 p.103-104

Source: Quotations from the books of Jozef Rulof

18.9 Birth and evolution of Mother Nature as plant, flower, tree

The rotting process of the first human cellular life therefore resulted in animal life. This cell life also died again and rotting followed after rotting. This evolution continued and so the first greenery became visible in the waters. Mother nature was born. Later we see nature on land again as plant, flower, tree. Just as humans and animals, nature has a physical body, spirit and soul.

Source: Quotations from the books of Jozef Rulof

-Isn't it true, that can be experienced, seen and followed here, we had to accept those laws; from the human cell, the material self as they call that, the first human material skin, seven animal grades of life emerged and that became the animal world, and it is only then that Mother Nature began.

The Cosmology of Jozef Rulof part 2 p.214

-That water could not go away, and the beings lived in that water: human being and animal. And afterwards – but then we were already millions of years on our way, but I will go back a bit, I will hold onto that stage – by means of the rot- ting that slime came, another division came. That started to condense, that had to condense, that experienced an evolution.

And one day when it had become so close in the water, then the grass blades came above the water. Can you feel? That has become nature. They are now your trees, your flowers.

Question and Answer Part 5 p.37

-A flower is a part, is a particle of God, of His light, of His life, of His realm of colours. Lectures Part 2 p.38

Lesson 19. Animal and nature in the Spheres of Light

19.1 Animal species come from one source and have a group spirit

All animal species come from one source, which has branched into different life forms. The species continue to develop as a group, as a mass and as a group spirit. The lower species dissolve and the higher species continue. The highest form of any kind, such as the dog and the horse, is reflected in the Spheres of Light. But that mass, that group spirit continues to develop and ultimately these highest developed species will also dissolve in the highest form: the winged species.

Source: Quotations from the books of Jozef Rulof

-Your dog and cat, those animals need ten million years in order to be a winged animal, ten million years. Because, you know, those animal species are still very young, they only began thousands of years ago. And creation is millions of years old. So those are already species... One and a half million years ago you did not see these species. And that is all evolution, branches, divisions, you see, from a source. And that sources branches off by means of different life forms. And your dog and cat have the time, as a group. We now call that a group spirit, and a group life, as masses. Those masses attract each other and continue and keep going until the last animal dissolves.

-So that animal gradually enters the winged species by giving birth, and suddenly dissolves, and you see that there and there, there and there. Question and Answer Part 6 p.258

-But the highest grade will remain. And then you get one species from every grade. Question and Answer Part 6 p.340

19.2 Death and reincarnation for animals and nature

If an animal, bird or plant dies, there is no separate world of the unconsciousness, as with humans. Yet this consciousness must also reincarnate in order to develop. The possibility of reincarnation lies in the seed for the plant kingdom. For the animal, the possibility of reincarnation is in the ovaries. Each species is also connected to the group spirit.

Source: Quotations from the books of Jozef Rulof

-In nature I could draw their attention to thousands of examples of reincarnations, in a germ, that minute seed, lives the multicolored perfect flower. People know all that, but they do not reflect and do not feel that this wonder means reincarnation for the vegetable kingdom. It is no different for mankind and the animal kingdom.

The Origin of the Universe p.398

-But the animal, the dog, the cat, if that animal has cancer, just have it put down, because you give that animal the mercy.

We may say that to you and we can say that to you, if that animal experiences nothing, absolutely nothing.

-That animal must come back, must evolve and will probably also come back in different breeds for this breed of dog, animal-like consciousness.

Question and Answer Part 5 p.178-179

-The chicken has no astral world to wait for, because that is in the ovaries, in the motherhood of that animal; also of the dog, and also of the cat, and for all those species which continually create and give birth, reincarnation is in the ovary.

Question and Answer Part 3 p.198

19.3 Animals in the Spheres of Light

When the animal has finished its development on Earth, spirit and soul will continue in the Spheres of Light. Only the highest form of each species, such as the dog and the horse, can be seen in the Spheres of Light. Wild animals cannot reach the spheres. Animals in the Spheres of Light live in the vicinity of humans, but in their own sphere. If man wants to, he can call the animal to him with the power of thought. Just as with humans, animal development continues. One day they will have passed their thousands of stages and will manifest themselves in the form of beautiful birds that communicate with humans.

Source: Quotations from the books of Jozef Rulof

-I told you some time ago that I have animals too, but don't think they're around us. They live in our surroundings, but in a different sphere. A View into the Hereafter p.166

-I too had a little dog on earth and he is often in my company on this side. The little animal passed on and this is where I saw it again. Whenever I want to see it I call him over, as I will presently show you. A View into the Hereafter p.(3)179

- On this side André, we do not know wild animals.

-When an animal leaves the earth, in other words when it dies, it doesn't matter what race it belongs to, it casts off its life.

Can you understand that?

Man enters this place just as he feels on earth, but an animal casts off physical life and enters his spiritual life.'

A View into the Hereafter p. (3) 181

19.4 Fishes in the Spheres of Light

The fish in the waters are an independent world group, a group of feeling with material attunement. This group is also developing. The highest grade that we know here on earth is the tropical fan fish. We see these fish in the Spheres of Light in the waters. The fish as a group also continues to manifest itself as fish in the further development in the spheres and later on the fourth Cosmic Degree.

Source: Quotations from the books of Jozef Rulof

-The fishes in the waters will die out one day and will have experienced their space. Now you have the highest grade of the fish species, they are those fan-tailed little fish, those beautiful little fish in the East. That is the highest grade. Those you put in an aquarium, aren't they? You can see them again on the other side in the waters. You can also experience your apple tree, your tree of paradise, you can eat your apple there in a sphere. What sphere? That exists too.

But that group spirit as a lower consciousness, will dissolve completely. But the highest grade will remain. And then you get one species from every grade. So you can also experience those fish in a spiritual state. Question and Answer Part 6 p.340

-So that fish, those goldfish, and all those species of fish, experience their highest grade. That is a world group. That is a group of feeling, with material attunement. So the fish remains a fish. The flower remains a flower. And the animal remains an animal. And the human being remains a human being. -So you get different existing species as an independence. Otherwise you would not see any flowers, any nature, in the spheres. But that is there, irrevocably. And of course, if you go to the fourth cosmic grade, everything is different again; but you still have fish, you still have animals, flowers, trees, people, spaces, plants, light. Question and Answer Part 6 p.288

19.5 Birds in the Spheres of Light

We also see the higher species of the Earth in the Spheres of Light for the winged species, the birds. The highly developed species of animals that have reached the Spheres of Light will someday dissolve in the highest form: the winged species.

Birds in the Spheres live with humans and can also speak with humans.

Source: Quotations from the books of Jozef Rulof

-That animal must come back, must evolve and will probably also come back in different breeds for this breed of dog, animal-like consciousness.

But one day it will fly into the universe, the animal, the dog, the cat, the tiger, the lion, every animal species gets spatial consciousness. And what is that? I told you that, that is the winged sort. Question and Answer Part 5 p.178-179

-And a lion and a tiger, the real animal species on the land, the ape too, must it all remain there? They get wings, and many animals already have them and soon they will also get the spiritual wings and then they will live 'behind the coffin', on the other side, and go with us to the conscious divine All.

Question and Answer Part 3 p.69

-All this life returns to God.

We see millions of birds, they come to us.

They perch on your stretched-out hand and speak a language that you understand.

Masks and Men p.929

19.6 Flowers in the Spheres of Light are attuned to the color kingdom of God and are connected to man

The floral life in the Spheres of Light is attuned to the color kingdom of God, is indescribably beautiful and is directly connected with the human being in a wonderful way.

Every flower here represents the life, thoughts and character traits of the human being.

So, millions of flowers interpret the human life.

They live by means of the human being!

If the human being was to with- draw, this life would dissolve.

Source: Quotations from the books of Jozef Rulof

A flower is a part, is a particle of God, of His light, of His life, of His realm of colors. Lectures 2 p. 38

-Every flower here therefore represents your own life, your thoughts, your character traits, so that millions of flowers interpret your life here. They live by means of the human being!

If the human being was to with- draw, this life would dissolve.

-You see every spatial law again, as light, life, soul and spirit, also for fatherhood and motherhood, in our life as a flower of life.

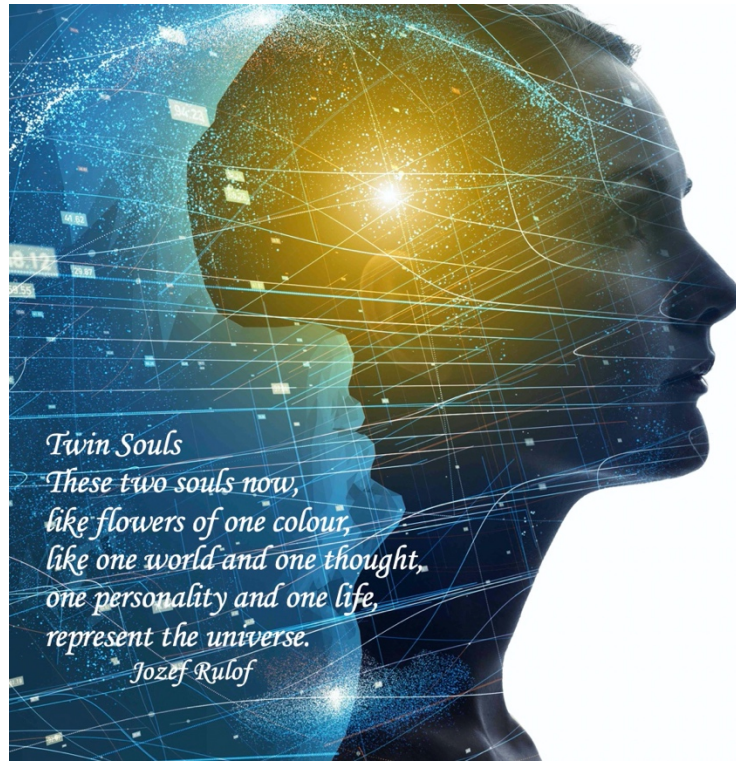

The Cosmology of Jozef Rulof part 4 p.248

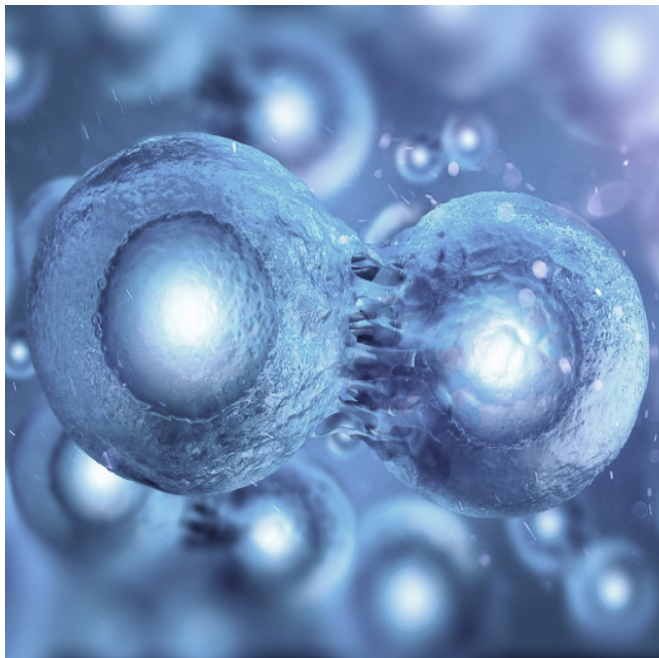

-Millions of species of flowers welcomed us and asked our human heart for love. We descended into these lives and became one with this bliss. We understood!

-There were flowers that dissolved into the clouds, a sign that they were already one with those other worlds and sent out their feelers in there, absorbed the life saps into themselves, as a result of which they already received and experienced a spiritualization here.

Masks and Men p.929

Lesson 20. Twin Souls in Cosmic perspective

20.1 Twinsouls originated at the beginning of creation

At the beginning of creation, the All-Motherhood formed a sphere of spiritual nebula plasma, in which the first planet, Mother Moon, emerged. In here billions of god-human cells separated. Small translucent droplets made up of plasma and soul. These cells formed pairs and connected. Each cell gave a part of itself to the other, from which a new cell grew. The new formed cell then split into two children cells. These had got enough power to grow to maturity, but not enough to reproduce. For this they needed the power of the parent cells, which had died in the meantime and waited in the world of the unconscious. Their souls connected with the children's process of reproduction and inspired the new fruit, which also split in two cells. A process that we still see in the human womb here in our time on Earth. In this way billions of cell pairs were formed on the first planet and started together as twin souls with their evolution process.

Source: Quotations from the books of Jozef Rulof

-But on the moon, we dealt with that a moment ago, we were division and division, divine core as embryo, and gave one life to the other one. And from that giving of mine and from yours new lives originated. And that is now that actual core which belongs to me and to you, by means of which we became father and mother. They are now those twin states. Question and Answer 3 p.120

-Anyone who was a spark of God now, which soul, that means nothing. So I mean for the very first contact, the dividing of that soul with the other life spark. Isn't it true, millions of sparks of God belong to one attunement. The Cosmology 5 p.61

See also: [Film + Article: Our first lives as a cell](#)

20.2 Connected forever by Twinsoul love

On our cosmic path of life we have a permanent life partner, our twin soul. Already at the first split on the first planet this love originated. This twin soul love is so special, because it belonged to the divine division and was born directly from Almotherly thinking, feeling and consciousness. A love that cannot be compared with falling in love as we know it as people here on Earth. We can never experience that special love, being one with that other, with anyone else except our twin soul.

-It is the part by which we experienced the oneness, no one can never ever give that to you again in the universe, because here we belong to the Divine division. Can you feel this? This is still Divine conscious creating and giving birth. This happens from the immediate Divine, All-Mother thinking, feeling and consciousness.

Lectures 2 p.50

-The twin love for which you are waiting and which you are busy earning, is the holiest union we know on this side and is the highest happiness God can bestow on His Children. This love gives, it serves; she merges with him and he with her, they live through their feelings, in prayer and in faith, while they work for one goal, to bring happiness to mankind and all the other life that 'god has created.

The cycle of the Soul p.186-187

-Where man and wife have achieved spiritual happiness, so that they love and understand each other completely, it can be said that they have "twinlove", that they are "twinsouls". That is, they are "of the same colour", one in their feeling and thinking.

My Revelations to the people of the Earth 1947 p.372

20.3 On Earth every twin soul must make up for his own karma and each one follows his own way

When the twin souls were attracted to Mother Earth in their evolution, they still lived in harmony with each other in the beginning. But as souls developed further, disharmony occurred at some point. They connected themselves with souls other than their own twin soul, committed murder after murder and thus entered human chaos. This degradation and disharmony created karma, which had to be compensated for individually by each soul. The laws of Karma and of Cause and Effect forced each soul to follow its own path of development, separate from the other.

Source: Quotations from the books of Jozef Rulof

-And if the human being now on earth had not began with disharmony – do you feel this? – then there would only have been paradise-like happiness in society. But from the jungle, when we started to think humanly, we interfered with another life, another grade of life, one of those millions of sparks there. Lectures 2 p.27

You all live... the whole of this world, all those millions of people here on earth experienced karmic laws. You still do not have your eternal divine self walking next to you, which you still have to earn, or you would no longer be here. Question and Answer 5 p.244

The soul lives in Holland; the mother, the twin soul, in France. The man lives in England; the mother, as twin soul, in Russia! The mother lives in America; the twin soul in Germany! The man lives in Sweden; the twin soul of this creating power in Turkey... so that we have to accept that the human being has to experience karmic laws and only receives his soul later, but then he will be in harmony with the universe. The Cosmology 5 p.193

20.4 Although separated from each other, the twin soul feels a hidden desire for the other

**On Earth, each twin soul follows his own development path.
The Cosmic laws of Karma and Cause and Effect
ensure that we primarily meet souls with whom we
have a karmic relationship.**

**We have to make something right and learn from each other.
We fall in love, have children and if we do well, we learn
from all those life lessons and our karma slowly dissolves.
Yet there are people who feel that there must also be another
deeper love than what they experience.**

**It is the hidden longing for their own twin soul that they
will not normally meet in this life.**

But one day our twin soul will come back to us!

*-In each life I searched for that 'love' which would understand me,
but I did not find it. I lived in my own 'cause and effect',
which meant sorrow and grief and awakening.*

*However, I kept on yearning for that love, kept asking 'why'
and 'what for'. There was sensitivity in me, a great deal of feeling
and I was prepared to make up, but the means were beyond me.
I travelled round the earth, poor, and then again sometimes rich.*

All peoples attracted my soul.

Between Life and Dead p.346

*-You are twin souls, you are one in everything,
in feeling, in understanding and in love.*

*-This Love is powerful and because it is so powerful
yoy will have to earn this great power which*

The cycle of the Soul p.185

20.5 Sometimes twin souls meet on Earth

**As a result of Karma, every soul must follow its
 own path, without his or her twin soul.
 Yet it may be that they meet on earth.
 That doesn't always have to be as man and wife.
 Father and daughter can also be twin souls.
 Two men or two women. Every Earth combination is possible.
 Young and old, poor and rich, ugly and beautiful.
 You recognize each other as a twin soul by the special and
 lasting feeling of twin soul Love.
 Twin souls understand each other perfectly, love each other
 perfectly and are then one of color and one of feeling and
 thinking.**

*-There even are people on earth who have their eternal twin soul.
 But most people on earth, and only those who yearn, long, feel
 and can give much love, who are conscious in their feeling and
 love will receive their twin-soul on this side, that bond is forever.
 However, that is only possible when they love and understand
 themselves, the life of their own soul and all other life. Souls,
 people, then receive the mightiest bliss man can ever receive
 and that is the twinlove. The Origin of the Universep.478*

*-Mothers and fathers love and are twin souls,
 they carry the universe, but the child was attracted by one soul,
 by the father or the mother and receives, or gives, or serves!
 Mother and child can be twin souls!
 Father and daughter can be twin souls!
 Brothers and sisters, and both sisters and sisters
 can be twin souls, because they keep on meeting each other!
 The rich and the poor can be twin souls! The Cosmology 5 p.193*

20.6 In the Spheres of Light twin souls continue together again

All twin souls are born of the Divine All-Source and sooner or later they reach the Heavenly Spheres of Light.

Here they continue their way together, together.

As souls of one world, one personality, one life and as flowers of one color, they represent space.

Only together these twin souls can be able to bear this happiness and experience that the universe is in them and that God lives in them.

Sometimes twin souls from the Spheres of Light want to do something for humanity on Earth. An example of this is the couple Curie, a twin soul, who brought new insights into radioactivity on Earth.

Source: Quotations from the books of Jozef Rulof

-These two souls now, like flowers of one colour, like one world and one thought, one personality and one life, represent the universe.

Only they are capable of carrying and representing the macrocosmic life, because they are now: light... life... and... love!

The Cosmology 5 p.189

This feeling, this happiness, my son, is tremendous. It is so mighty and great that you float and feel like being adored.

Everything smiles at you. You pass into the eternal quiet, you feel connected with God, and you feel pure love for man and animal and the life God created. There is a sacred fire deep within you, the Divine fire out of and by which created heaven and earth. All that mighty life will find a place in your heart and she or he who belongs to you feels like you do, loves like you love, carries the way you will; both will bend their head for all those pure gifts.

The Origin of the Universe p.478

20.7 Sometimes a twin soul who has reached the Spheres of Light must wait a while for the other

A twin soul who has to make good a lot of karma or even still causes karma will need more time on Earth to develop, than the other. As a result, there are souls in the Spheres of Light who still have to wait for their twin soul. It may be then, that the other soul is on Earth, but it is also possible that it is in the World of the Unconscious and is waiting for a new life on Earth. It is also possible that the other soul has already finished the lives on Earth but had developed such a spiritual level there, that this soul had been attracted by the dark spheres. The twin soul that has to wait, however, still has enough to learn and sometimes has the option of helping the other soul as a coaching guide.

-Every wrong action, a violating of the life of God, takes us away from this being one, from our twin soul. Yet one day we will come back to each other. -Since the life obtains consciousness, cause and effect build up. The Cosmology 5 p.101

-Then it may be possible, again, that the twinsoul for whom you are longing is still on Earth, or, that she is in the land of unconsciousness, waiting there to be attracted by Mother Earth. -There is so much for you still to learn. And then, you also may be able to help your twinsoul who still has to go through another life on Earth, from here. My Revelations to the people of the Earth 1947 p.374

-One day my personality will awaken. One day I will be that far, that I will start to experience the feeling that I am missing a part of myself, and that is now my twin soul. It is only in the Spheres of Light that she will come back to my life, or perhaps sooner, and I will see her, I will feel her in the darkness, because that is also possible. The Cosmology 5 p.101

20.8 After the Spheres of Light the twin souls are attracted by the Fourth Cosmic Degree

After Earth, the twin soul goes through the seven Celestial Spheres of Light. They are then attracted by the Fourth Cosmic grade of life. The Fourth Cosmic grade of life is in another Universe, which consists of a more delicate substance. Just like on Earth, man again has a physical body, but very thin, almost transparent and of an indescribable beauty. Here too the laws of Fatherhood and Motherhood and of Reincarnation drive the further development of the twin souls up to the Divine All.

Source: Quotations from the books of Jozef Rulof

-When a child is born they know the attunement of this young life beforehand and above all where the inner life, the soul as spirit and as human being, lived, who it is and where they have met and known this inner life.

-They are all, without exception, clairvoyant to the highest degree. These people, André, are cosmically conscious, cosmically orientated, they know who belong to them, for all are twin-souls. The Origin of the Universe p.476-477

-In the fifth, sixth and the seventh cosmic grade, are there also material beings there? They are still material bodies, built up by a spiritual substance. Do you see? The mother still gives birth as far as the sixth cosmic grade. And then you pass over into the Divine All, and then mother and father are, man and wife, they are one life, two people.

-You are divine light, divine life, a divine personality, because you have experienced the laws, by means of fatherhood and motherhood. Do you see how simple that it is actually becoming?

You now look through all those worlds.

Question and Answer 6 p.28-29

20.9 Twin souls experience Divine oneness

We become Divine Twin Souls

-This becomes the answer to all these questions, which you will soon ask for paternal love and maternal love, it is only now that you will sense as a child of the earth what you will soon give in love by means of your cosmic consciousness and you will sense what Christ meant, how deep Christ is in love!

Believe us, we will follow you in everything! We know this love. We possess, carry that love. We became Divine twin souls as man and wife! The human being becomes a Deity in love!

The Cosmology 2 p.182-183

Sun and Moon are twin souls

-Sun and Moon were able to condense themselves for the first time with the origin of the creation and motherhood continued to accept that warmed plasma, but by means of this the life condensed itself in an embryonic state.

The Sun as the paternal authority emitted that power and the Mother as the First Cosmic Grade of Life absorbed that sacred working into herself. And because the Sun still did not possess those powers for the present stage, they experienced this Divine and spatial oneness. By means of that Sun and Moon are one life, they are twin souls.

The Cosmology 1 p.190

-If we were to analyse all those pictures for fatherhood and motherhood and the twin love and for the astral world, then we would have to write a hundred books for your consciousness. Here and there we can only intervene in order to give you a picture.

Lectures 1 p.357

- [Lectures Part 1](#)
- [Lectures Part 2](#)
- [Lectures Part 3](#)

Wisdoms from Heaven are based on the books of the metaphysician and prophet Jozef Rulof (1898-1952). With the help of his Heavenly Masters, he was able to disembody and then as a spirit he was able to visit the astral worlds after the death.

Here the Cosmic Laws, who guide all life, were learned to him.

On the mentioned website you will find all books, articles and reference works that together contain a wealth of spiritual Wisdom and Knowledge.

Read and be amazed!

Wisdom from Heaven are about the origin and essence of Life and gives a clear insight in topics such as:

- Life after death and the meaning of life
- The birth of the soul from the two Cosmic Divine Basic Forces of the All-Source
- The spiritual path of the soul, the evolution back to the Source
- Everything in the Universe is changing and evolving
- The human soul is the core of this Divine evolution
- The most important Cosmic Basic Forces and Laws are:
 - The Cosmic Motherhood, the expanding force
 - The Cosmic Fatherhood, the condensing and creative force
 - The Law of Reincarnation
- The Law of Karma and the Law of Cause and Effect
- These Cosmic Laws govern the expanding Universe, but also the birth of a child on Earth
- Creation, birth and evolution of humans, animals, nature and the universe
- What is the reality behind the big bang and the expanding universe
- Our soul is on a cosmic journey and has once lived, in a primitive body, on Mars
- Talent, character, emotional life has been built up in past lives.
- The cause for phobias and fears often lies in past lives

All these wisdoms are based on a Unique All-embracing Wisdom, which comes directly from the Spheres of Light and which was only detailed and well founded brought to Earth in the last century by the metaphysicist Jozef Rulof and his Heavenly Masters.

We, the people of our time, are now so far evolved, that we can understand this Heavenly Knowledge and, more importantly, we can feel it!
